Acting as a bridge between the basic theory of Chinese medicine (CM) and various clinical subjects, Diagnostics in Chinese Medicine can be regarded as a core subject in understanding the concept of CM. Based on the national textbooks of CM in China, Diagnostics in Chinese Medicine is written combined with the National Standard and Quality Course given by Professor Chen Jiaxu at Beijing University of CM. According to Professor Chen's long-standing high academic profile and clinical practice, figures and tables are presented clearly to intensify understanding and comprehension. We are sorry that the DVD content are not included.

This book is organized around the 'four pillars' of TCM diagnosis: inspection, inquiry, listening and smelling, and palpation. In this text, each aspect is explained in a clear and systematic manner, with generous use of tables and illustrations. This is followed by a series of review questions for deeper understanding. A comprehensive self-examination consisting of 200 multiple choice questions, with a separate key to the answers, tests the reader's understanding of the important points of each aspect of diagnosis. These questions, many of which are presented in case study format, will help students prepare for the board exams.

This translation of the original Chinese text provides a guide to clinical examination and differential diagnosis in traditional Chinese medicine. It examines the diagnostic method used in traditional Chinese medicine and relates it to TCM syndromes. Colour plates illuminate key diagnostic signs.

The principles and practice of diagnostics are key to administering effective treatment in traditional Chinese medicine. The ability to recognise and diagnose symptoms and complaints correctly is fundamental to deciding on appropriate remedies, and this book provides a comprehensive introduction to all the principles that students and practitioners need to know. The authors outline the key methods used in diagnosis, and describe the eight basic categories of ailment and disease: yin and yang, exterior and interior, cold and heat, and deficiency and excess. They provide detailed instructions on how to identify and rebalance the relative strengths of pathogens and Qi in the body, and how to differentiate between syndromes that might look the same, using traditional Chinese medicine methods. The book concludes with useful forms for completion in taking a diagnosis. Combining practical instruction with detailed theory, this authoritative textbook, compiled by the China Beijing International Acupuncture Training Center (CBIATC), under the editorial direction of leading Chinese clinicians Zhu Bing and Wang Hongcai, is an excellent reference for students and practitioners at all levels.

A favorite for first year acupuncture and TCM students because it covers the essential knowledge of the channels and collaterals and the characteristics of the channel system, providing descriptives that include the key points, pathway, associated organs and points, physiology, pathology, clinical applications, and divergent, teninomuscular, and collateral channels.

This textbook on diagnosis in Chinese medicine is unique in its clarity and accessibility. Divided into two sections, it is a comprehensive diagnostic manual. The first section explains how to collect and collate the information required to formulate a diagnosis and is divided into four approaches: visual, palpation, interrogation and listening/smelling. The second section describes the various diagnostic models in Chinese medicine, including The Eight Principles; zangfu organ pattern; the Six stages, four levels and san jiao; the twelve regular channels and eight extraordinary vessels; and the Five Phases.
