While the primary purpose of the book is a celebration of John's
contributions to the field of measurement, a second and related
purpose is to provide a useful resource. We believe that the
combination of the developmental history and theory of the method, the
examples of its use in practice, some possible future directions, and
software and data files will make this book a valuable resource for
teachers and scholars of the Rasch method. This book is a tribute to
Professor John P Keeves for the advocacy of the Rasch model in

Australia. Happy 80th birthday John! xii There are good introductory texts on Item Response Theory, Objective Measurement and the Rasch model. However, for a beginning researcher keen on utilising the potentials of the Rasch model, theoretical discussions of test theory and associated indices do not meet their pragmatic needs. Furthermore, many researchers in measurement still have little or no knowledge of the features of the Rasch model and its use in a variety of situations and disciplines. This book attempts to describe the underlying axioms of test theory, and, in particular, the concepts of objective measurement and the Rasch model, and then link theory to practice. We have been introduced to the various models of test theory during our graduate days. It was time for us to share with those keen in the field of measurement in education, psychology and the social sciences the theoretical and practical aspects of objective measurement.

The new interdisciplinary field of Christianity and economics deals with the important and difficult questions that cluster at the boundary of these disciplines, drawing on contemporary theory and empirical findings in both fields, with roots in older discourses. This landmark volume surveys the field and advances the discussion. It deploys historical, economic, and theological analysis to search for answers.

The beliefs of economists are not solely determined by empirical evidence in direct relation to the theories and models they hold. Economists hold 'ontological presuppositions', fundamental ideas about the nature of being which direct their thinking about economic behaviour. In this volume, leading philosophers and economists examine these hidden presuppositions, searching for a 'world view' of economics. What properties are attributed to human individuals in economic theories, and which are excluded? Does economic man exist? Do markets have an essence? Do macroeconomic aggregates exist? Is the economy a mechanism, the functioning of which is governed by a limited set of distinct causes? What are the methodological implications of

different ontological starting points? This collection, which establishes economic ontology as a coordinated field of study, will be of great value to economists and philosophers of social sciences. -- Back cover.

A number of books on economic psychology have appeared in the past few years. The most recent publications are by MacFadyen and Mac Fadyen (1986), Furnham and Lewis (1986), Lea et al. (1987) and Van Raaij et al. (1988). Why produce yet another book for this discipline? This question can be answered in various ways. In a sense, this book is the answer in itself. Its presentation of research and theories is innovative in this field, at least to my knowledge. It attempts to structure the many theories emerging in the interdisciplinary science of economic psychology and to explain the background of the research. The second answer is pragmatic. In our introductory course of economic psychology for economics students at Erasmus University Rotterdam we used several of the above mentioned books. Our experience with this material is that, when preparing our lectures, we had to explain many additional theories and experiments to our students. Furthermore, diagrams, figures and examples had to be culled from other sources or made by ourselves. It is not my intention to run down these publications since I think they provide an excellent treatment of a

number of topics by specialists in economic psychology. The plan for the present book, however, emerged from our need to present an integrated introductory course for our students.

Media industries and services present a complex set of challenges to economic analysis: challenges made more difficult by the technological changes that have been transforming the media sector. Research on the economics of media has made major advances

In this book, economists and literary scholars examine the uses to which the Robinson Crusoe figure has been put by the economics discipline since the publication of Defoe's novel in 1719. The authors' critical readings of two centuries of texts that have made use of Robinson Crusoe undermine the pervasive belief of mainstream economics that Robinson Crusoe is a benign representative of economic agency, and that he, like other economic agents, can be understood independently of historical and cultural specificity. The book provides a detailed account of the appearance of Robinson Crusoe in the economics literature and in a plethora of modern economics texts, in which, for example, we find Crusoe is portrayed as a schizophrenic consumer/producer trying to maximize his personal well-being. Using poststructuralist, feminist, postcolonial, Marxist and literary

criticism approaches, the authors of the fourteen chapters in this volume examine and critique some of the deepest, fundamental assumptions neoclassical economics hold about human nature; the political economy of colonization; international trade; and the pervasive gendered organization of social relations. The contributors to this volume can be seen as engaging in the emerging conversation between economists and literary scholars known as the New Economic Criticism. They offer unique perspectives on how the economy and economic thought can be read through different disciplinary lenses. Economists pay attention to rhetoric and metaphor deployed in economics, and literary scholars have found new areas to explore and understand by focusing on economic concepts and vocabulary encountered in literary texts.

Speeches delivered by author on various occasions; with special referenc to Indian women.
