[Dr John Lee's Hormone Balance Made Simple: The Essential](#)

John R. Lee, MD, (1929-2003) was internationally acknowledged as a pioneer and expert in the study and use of the hormone progesterone, and on the subject of hormone replacement therapy for women. Dr. Lee had a distinguished medical career, including graduating from Harvard and the University of Minnesota Medical School.

From the bestselling authors of the classic "What Your Doctor May NOT Tell You" books about menopause and pre-menopause comes an easy-to-use guide on balancing hormone levels safely and naturally. Dr. John Lee will help you answer key questions like: Are my symptoms caused by a hormonal imbalance? Which hormones do I need to regain hormone balance? How do I use hormones for optimal health and balance? Plus, learn how and when to use estrogen, testosterone and progesterone cream, in simple, effective language. If you want the ABCs of using natural hormones, this book is for you.

Arguing that giving estrogen replacement therapy to women after menopause is medically the wrong thing to do, Lee suggests that natural progesterone can prevent most of the unpleasant side effects of menopause, including osteoporosis and weight gain.

A safe, effective hormone balance program for women aged 30-50 suffering from premenopause syndrome. Restore and maintain gynecological health, sex drive, and energy. I'm too young for menopause. So why do I feel like this? Even if you're a decade or more away from menopause, your hormones may already be out of balance, usually caused by an excess of estrogen and a deficiency of progesterone. Over 50 million women experience premenopause symptoms, including: Unexplained, sudden weight gain Severe PMS, fatigue, irritability, and mood swings Loss of libido Tender or lumpy breasts Fibroids and endometriosis Cold hands and feet Very heavy or light periods Or other symptoms like infertility, memory loss, and migraines. Now Dr. John Lee-author of the groundbreaking What Your Doctor May Not Tell You About Menopause-teams up with women's health expert Jesse Hanley, M.D., to bring you a revolutionary nonprescription "Balance Program" with simple, safe, and natural solutions for premenopause. Learn how natural progesterone and changes to your diet and environment can balance your hormones, eliminate premenopausal symptoms, and make you feel better-all without surgery, antidepressants, or prescription hormones.

Each year, over 40,000 women in the U.S. die from breast cancer. With statistics rising, conventional methods of treatment are simply not working, and in some cases may even be harmful. Now, Drs. Lee and Zava explain the potentially life-saving facts, such as: likely sources for the increase in breast cancer, including environment, excessive estrogen, progesterone imbalance, diet, and the dangers associated with traditional hormone replacement methods. Readers will learn strategies for lowering their risk and preventing this devastating disease through a revolutionary hormone balance program.

The bestselling authors of the series "What Your Doctor May Not Tell You About" bring women an easy-to-use guide on balancing hormone levels safely and naturally.

Breast cancer is on the increase in the West and, despite governments spending billions on research and new treatments, your chances of survival are roughly the same today as they were 50 years ago. This controversial book exposes the failings of conventional treatments of breast cancers and offers a revolutionary programme for lowering the risk of breast cancer, significantly improving your chances of recovering from this disease, and preventing a reoccurrence. Topics include: teenagers taking the pill are 600 per cent more likely to get breast cancer; biopsies, mammograms and chemotherapy often do more damage than good; 80 per cent of breast cancers are brought on by environmental factors, such as diet and exposure to toxins and pollutants; natural progesterone helps prevent and treat breast cancer; and explains that 30 minutes of moderate exercise a day may save your life.

Draws on cutting-edge findings in bioidentical hormone replacement to counsel women on how to enable maximum health using real-world lifestyle practices and natural therapies. in a guide that challenges popular misconceptions while addressing a range of health concerns. Reprint. 10,000 first printing.

Do you want to maintain your health and energy level as you age? If so, then it is essential that you replenish your declining hormones. In Hormones, Health, and Happiness, Dr. Steven Hotze reveals how restoring hormones to optimal levels using natural, bioidentical hormones enables women and men to regain their vitality. Dr. Hotze discusses the frequently overlooked problem of hypothyroidism, which commonly affects women in midlife. Too often, women with all the signs of low thyroid are told that their blood results are normal. Find out why women should believe what their bodies are telling them rather than the results of a blood test. The conventional medical approach treats symptoms with "anti" drugs, such as antidepressants, antihistamines, antispasmodics, anti-arthritis, and others, rather than discovering and correcting the underlying problems of these symptoms. In Hormones, Health, and Happiness, Dr. Hotze discusses symptoms of women and men in midlife, which include fatigue, weight gain, headaches, depression, insomnia, hot flashes, joint and muscle pain, brain fog, loss of interest in sex, allergies, and recurrent infections, to name a few, and addresses their solutions. His comprehensive eight-point wellness program will help you strengthen your immune system, balance your hormones, and increase your energy level. This program encompasses: • Treatment of low thyroid • Treatment of hormonal decline and imbalance • Treatment of adrenal fatigue • Treatment of yeast overgrowth • Treatment of airborne allergies • Treatment of food allergies • Vitamin and mineral supplementation • Nutritionally balanced eating program Dr. Hotze demonstrates how many health problems can be solved safely, effectively, and naturally without drugs. If you are sick and tired of being sick and tired, then it's time to take charge of your health and get your life back. By following Dr. Hotze's recommendations you can begin your journey down a life-long path of health and happiness.
