collection of essays which draws our attention to the importance of those textual elements

traditionally ignored in literary criticism. These include punctuation, footnotes, epigraphs, typography, cover design, white space and marginalia; features which significantly affect the meaning of a literary text. The first section of

The book opens with a proposal for a new theory of punctuation. The essays which follow are devoted to detailed interpretations of particular marks in the work of individual writers, including Spenser, Richardson and George Eliot. The consequences of this approach to the literary text are examined in the

second section of the book, which begins with a debate on editorial practice and responsibility, and features insights from editors. With a pastor's heart and a scholar's insight, he helps us to bridge the gap between Paul's world and our own, providing the perspective we need to begin to make sense of Paul the man and his message. Whether you stand outside the church

Looking in or whether even from the inside you struggle to make sense of Paul in the contemporary world, The Problem with Paul will deepen your understanding and help you to grapple with one of the New Testament's most important authors.
