No-Code application development platforms have seen a major rise in popularity in the last decade, primarily because these platforms offer a great way for businesses and other organizations to develop apps that meet their needs without having to involve professional software developers. Due to the lack of programming knowledge needed, it's not surprising that Gartner (a leading research and advisory firm) projects that by 2025, 65% of all app development will be done on No-Code platforms. If you've ever had an idea you wanted to turn into an app but didn't have the money to pay a developer and didn't have time or inclination to learn how to code in order to create that app, no-code is your answer. If you know what you want to build, no-code platforms allow you to assemble a working program that follows best programming practices just by dragging and dropping components onto a screen. Of course it helps to have done some research into no-code apps including current trends, techniques, and tips on how to put together the best version of your application. That's where our blog comes in. "Mastering No-Code" (www.mastering-nocode.com) provides news, articles, examples,

explanations, and tips on how to become a "professional" no-code developer. If you're simply interested in learning how to build your own apps or if you want to create an app for sale, or to fill a business need, or just for fun, this book may help you get started. Even if you're already using a no-code platform you may find something interesting, so go ahead and take a look inside...Note: This material consists primarily of blog posts from Mastering No-Code (January through March 2021).
