Presents a selection of the author's poems from throughout his life, from playful early poems to themes of mourning and loss.

A powerful tribute to feminist sci-fi about bicycles. It gravitates away from the unfortunately-traditional macho heroes, hurtling through space with giant guns, ready to protect and/or tame their scantily clad space babe. Elly's visions of the future are

populated by strong, intelligent, empowered women with complex personalities. Heroines find meaning and freedom on two wheels in the confines of a gated space society and in the ravaged earth left behind. Racers compete in deep space and on otherworldly planets. From fantasy to hard sci-fi to dystopia, there's something for everyone in this little volume that launched a genre.

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal

languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very

fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L
Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.
