Betsey Stevenson and Justin Wolfers present a new synthesis of economic principles for a new generation of students. Their focus on useful economics employs compelling explanations and real-life examples to help students develop economic intuition and apply it to everyday decisions. The authors provide a fresh take on a wide range of principles topics and develop macroeconomics from its microfoundations in an engaging presentation that has drawn enthusiastic reviews from hundreds of instructors and thousands of students in pre-publication class-tests. This text is available in Achieve, a new, integrated online learning system that features powerful tools for each step of the Learning Path: pre-class, in-class, and

post-class.

Like no other text for the intermediate microeconomics course, Goolsbee, Levitt, and Syverson's *Microeconomics* bridges the gap between today's theory and practice. A strong empirical dimension tests theory and successfully applies it. With carefully crafted features and vivid examples, Goolsbee, Levitt, and Syverson's text helps answer two critical questions students ask, "Do people and firms really act as theory suggests" and "How can someone use microeconomics in a practical way?" The authors teach in economics departments and business schools and are active empirical microeconomics researchers. Their grounding in different areas of empirical research allows them to present the evidence developed in the last 20 years that has tested and refined the fundamental theories. Their teaching and professional experiences are reflected in an outstanding presentation of theories and applications.
