geopolitical trends as a main driving force of markets. This book provides just that: an understanding of the interplay between geopolitics and economics, and of the impact of that dynamic on financial markets. To me, geo-economics is the study of how geopolitics and economics interact in international relations. Plenty of

Books on geopolitics have been written by eminent experts in politics and international affairs. This book is not one of them. Geopolitics experts cannot answer the question of which geopolitical events matter for investors and which do not.

In the chapters that follow, I discuss geopolitical and geo-economic events from the viewpoint of an investor and show that they can be
