In 1949, Eichler hired a draftsman who produced more stylish but less overtly Modern designs for two new subdivisions in Palo Alto and Menlo Park. Eichler explained later that he had put off a wholehearted plunge into original architectural designs until he had acquired sufficient “experience and know-how” to manage a process that involved topflight architects and full fledged modern building techniques.

Fascination with Eichlers Peaks with Paul Adamson's Book 'Eichler: Modernism Rebuilds the American Dream'. For most of the past decade, I have been consumed by a fascination with the Eichler homes. I first wrote about them in 1984, when I was a graduate student of architecture at Columbia University. I argued then that California's Eichlers qualified as a modern vernacular: modern by social intent and aesthetic expression, and vernacular by their use of local materials and methods and their ...

Joseph Eichler was a pioneering developer who defied conventional wisdom by hiring progressive architects to design Modernist homes for the growing middle class of the 1950s. He was known for his innovations, including built-ins for streamlined kitchen work, for introducing a multipurpose room adjacent to the kitchen, and for the classic atrium that melded the indoors with the outdoors. For nearly twenty years, Eichler Homes built thousands of dwellings in California, acquiring national and international acclaim. Eichler: Modernism Rebuilds the American Dream examines Eichler's legacy as seen in his original homes and in the revival of the Modernist movement, which continues to grow today. The homes that Eichler built were modern in concept and expression, and yet comfortable for living. Eichler’s work left a legacy of design integrity and set standards for housing developers that remain unparalleled in the history of American building. This book captures and illustrates that legacy with impressive detail, engaging history, firsthand recollections about Eichler and his vision, and 250 photographs of Eichler homes in their prime. Paul Adamson, AIA, holds a Master of Architecture degree from Columbia University and has practiced in New York and San Francisco. He is currently a designer at the San Francisco firm of Hornberger + Worstell, Inc. He lives in Kensington, California. Marty Arbunich is director-publisher of the Eichler Network, a Bay Area-based company devoted exclusively to supporting and preserving the architecture and lifestyle surrounding California's 11,000 Eichler homes. He lives in San Francisco.

Catalogue of an exhibition held at the Faculty of Architecture Gallery, Architecture II Building (main floor), the University of Manitoba, Winnipeg, September 10-28, 1998.

Reveals the work of the innovative architects building in California from the 1940s to the 1970s and focuses on those that exemplify early mid-century modern, variations on minimalism, and organic architecture, such as Millard Sheets, Warren Callister, and Foster Rhodes Jackson.

In the 1950s, a series of dramatic, open, and elegant homes made him a media star, and interest in the work of his atelier has only increased over time."

The first monograph on the innovative early Case Study architect.

Affordable housing for the masses has been an age-old problem that some of the best minds in the world have tried to solve. Never was it more critical than after World War II, when many cities and economies were wiped clean and the world–quite literally–needed to be rebuilt. It was during this time that modern ideas led the way to the future. Modern Tract Homes of Los Angeles touches on the history of modern architecture and explores five housing tracts built between 1948 and 1964. Through these unique tracts, we gain an understanding of what the postwar climate was like and learn why modern houses still remain relevant today as new homeowners are drawn to their aesthetic and original homeowners continue to enjoy them more than half a century later. This engaging guide features 100+ images of interiors, exteriors, and decor and more than 40 archival images and floor plans.

The first full-scale account of the merchant builders who gave a major impetus to the postwar building boom in America and to the American dream of homeownership as an attainable goal for the average family.

Architect, artist, furniture designer, and educator, Ralph Rapson has played a leading role in the development and practice of modern architecture and design, both nationally and internationally.

Atomic Ranch is an in-depth exploration of post-World War II residential architecture in America. Mid-century ranches (1946-1970) range from the decidedly modern gable-roofed Joseph Eichler tracts in the San Francisco Bay area and butterfly wing houses in Palm Springs, Florida, to the unassuming brick or stucco L-shaped ranches and split-levels so common throughout the United States. Authors Michelle Gringeri-Brown and Jim Brown, founders and publishers of the popular quarterly Atomic Ranch magazine, extol the virtues of the tract, split-level, rambler home and its many unique qualities: private front facades, open floor plans, secluded bedroom wings, walls of glass, and an easy-living lifestyle. From updated homes with high-end Italian kitchens, terrazzo floors, and modern furniture to affordable homeowner renovations with eclectic thrift-store furnishings, Atomic Ranch presents twenty-five homes showcasing inspiring examples of stylish living through beautiful color photographs, including before and after shots, design-tip sidebars, and a thorough resource index. Atomic Ranch reveals: Hallmarks of the ranch style Inspiring original ranch homes Ranch house transformations and makeovers Preservation of mid-century neighborhoods Adding personality to a ranch home Yards and landscaping Plus, a helpful resource section and index!
