"aLearning: A Trail Guide to Association eLearning" is just what it says it is -- a guide that will help you: -- Discover new, affordable elearning options. -Match content to the appropriate online deployment option. -Integrate social media options into your curriculum. -Gain leadership support. -Estimate revenue and expenses so you can plan a workable budget. -Market your alearning initiative and assess its success. Packed with charts, activities, and step-by-step instructions for applying what you're reading, you'll have

completed a workable plan by the time you've finished the 270+ pages. Based on years of award-winning experience in adult and online learning, Ellen Behrens brings her association-specific perspective to this important guide, the result of her own successful launch of an association's online learning program and her previous corporate background in developing training for the Web.

New technologies can help teachers and trainers empower learners and create exciting new learning opportunities for students. However, these facilitators must also create e-learning contexts which are properly scaffolded to serve the needs of learners. Cases on E-Learning Management: Development and Implementation meets this challenge by providing innovative case studies covering a range of topics such as teacher education, mobile and blended learning strategies, e-learning tutorial content, digital cognitive games, Science, Technology, Engineering, and Mathematics (STEM) education, and distance education. This casebook will enhance the work of educators, instructional designers, trainers, administrators, and researchers in the areas of online learning and distance learning.

Explore effective learning programs with the father of e-learning Michael Allen's Guide to e-Learning: Building Interactive, Fun, and Effective Learning Programs for Any Company, Second Edition presents best practices for building interactive, fun, and effective online learning programs. This engaging text offers insight regarding what makes great e-learning, particularly from the perspectives of motivation and interactivity, and features history lessons that assist you in avoiding common pitfalls and guide you in the direction of e-

learning success. This updated edition also considers changes in technology and tools that facilitate the implementation of the strategies, guidelines, and techniques it presents. E-learning has experienced a surge in popularity over the past ten years, with education professionals around the world leveraging technology to facilitate instruction. From hybrid courses that integrate technology into traditional classroom instruction to full online courses that are conducted solely on the internet, a range of e-learning models is available. The key to creating a successful e-learning program lies in understanding how to use the tools at your disposal to create an interactive, engaging, and effective learning experience. Gain a new perspective on e-learning, and how technology can facilitate education Explore updated content, including coverage regarding learner interface, gamification, mobile learning, and individualization Discuss the experiences of others via targeted case studies, which cover good and not so good e-learning projects Understand key concepts through new examples that reinforce essential ideas and demonstrate their practical application Michael Allen's Guide to e-Learning: Building Interactive, Fun, and Effective Learning Programs for Any Company, Second Edition is an essential resource if you are studying for the e-Learning Instructional Design Certificate Program.

Handbook of Research on E-Learning Standards and Interoperability: Frameworks and Issues promotes the discussion of specific solutions for increasing the interoperability of standalone and Web-based educational tools. This book investigates issues arising from the deployment of learning standards and provides relevant theoretical frameworks and leading empirical research

findings. Chapters presented in this work are suitable for practitioners and researchers in the area of educational technology with a focus on content reusability and interoperability.

The call for case histories was announced in 2014 and 60 submissions were received, describing on an outline basis what was achieved with these ap-plications of e-Learning. There were 36 interesting examples described in these abstracts which were invited to forward a completed case history. The panel of experts then chose 12 case history finalists who were invited to present their work at the 14th annual European Conference on e-Learning at the University of Hertfordshire at Hatfield in the UK in October, 2015. As can be seen from the Contents page, the topics presented range widely, as was expected when working with a subject like e-Learning. It may also be observed that the entrants come from many different parts of the world. The competition requires the 3 best to be chosen and it is clear that the judges will have a challenging task to select the winners.

This book presents a tool to determine e-learning readiness in workplace organizations. It offers a case study of the design and development process and outlines factors to be taken into account to determine e-learning readiness. It details the four objectives of this tool: to highlight specific parameters for determining e-learning readiness, to provide a systematic process to determine the readiness of an organization, to enable flexibility for the environmental context, and to capture the interrelatedness of the many areas in the organization. Next, it discusses the main element of the tool: surveys that are used to facilitate collection of data on organizational, learner and technology readiness. The book concludes with a look at practical ways of using the information gathered from

the data produced.

This text focuses on the evolving role of trainers and training within the organization. It urges trainers not to be seduced by technology at the expense of their ultimate objective - to enhance learning. Built around a series of propositions, it examines: why barriers between knowledge management, performance management and training must fall if competitive advantage through people is realized; how technology that offers learner-centred opportunities will redefine the concept of the learning organization; why expertise in soft technology will give trainers new credibility; why time, not spend will be the scarce resource as learning competes with other organizational demands; the validity of corporate universities and virtual business schools; and what can be learnt from the different strategic responses to e-learning of blue-chip companies.

The Brave New World of eHR is an important resource, filled with the most current information and practical advice on eHR for human resource professionals and industrial and organizational psychologists. Written by an expert group of scholars, practitioners, and subject matter experts, this book offers an overview of the major technological trends in eHR, and shows how to use technology to enhance organizational effectiveness. Comprehensive in scope, the book includes information on a wide variety of topics and Reviews the transformation of human resources from manual processes to sophisticated CRM and ERP systems Examines the effectiveness of online strategies for attracting talent Offers valuable guidelines that can help organizations design, deliver, implement, and sustain e-selection systems Includes a review of the recent research on the effectiveness of distance learning in educational and organizational settings

Analyzes the potential advantages and disadvantages of using eHR to manage employee performance Shows how technology supports the administration of compensation systems Outlines recent trends in delivering HR products and services Considers the functional and dysfunctional consequences of using eHR to attract, select, and manage the performance of employees in organizations Presents a fascinating and futuristic look at HR and technology for decades to come
