Nation Branding: Concepts, Issues, Practice was the ground-breaking first textbook to provide an overview of this recently established but fast-growing practice, in which the principles of brand management are applied to countries rather than companies. Many governments have invested in nation branding in order to strengthen their country's influence, improve its reputation, or boost tourism, trade and investment. This new edition has been comprehensively revised and its influential original framework modified to reflect the very latest changes to this still-developing field. It remains an accessible blend of theory and practice rich with international examples and contributions. Updates to this edition: New international cases of countries as diverse as China, United Arab Emirates, Ghana, Cuba, India, Great Britain and many more; New contributions from distinguished scholars, diplomats and businesspeople providing a range of case studies, practitioner insights and academic perspectives; New Companion Website to support the book featuring instructor aids such as PowerPoint presentations for each chapter and an instructor manual; This much-anticipated update to an influential book is an essential introduction to nation branding for students and policy makers.

This book of proceedings collects fifty-one papers presented at the inaugural Colloquium of Administrative Science and Technology (CoAST 2013) event, held at Kuching, Sarawak, Malaysia. It has been reviewed by 750 experts world-wide and covers three main areas - Administrative Science and Technology, Management, and Arts and Humanities. The papers in this volume reflect: • the importance of the social sciences in academia and in the nations' social-economic growth; • the multi-disciplinary and trans-disciplinary nature of academia that transcends the broad areas of the social sciences; • the increasing trend towards fundamental studies in the social sciences, management, and the arts and the humanities, which have been characterized under the overarching theme of administrative science and technology; • the growing demand for research outcomes affecting the public and private sectors' service processes. The other overlapping niche areas affecting the civil service scope will ensure more interest in and readability of the findings showcased in this proceedings book; • the popular and contemporary measurement techniques and methodologies employed within the scopes of the social sciences and humanities; • the noticeably changing trends in administrative science and technology, which will greatly impact the governments of the world, allowing the development of a better understanding of governmental processes and their impact on key performance and e-service deliveries. The reporting on technology-based services will improve the public sector's agility; • a knowledge-sharing agenda for other developing and less developed nations to emulate; • some of the major generic developments that have taken place in these thematic areas of CoAST 2013.

This volume focuses on the theatre history of Asian countries, and discusses the specific context of theatre modernization in Asia. While Asian theatre is one of the primary interests within theatre scholarship in the world today, knowledge of Asian theatre history is very limited and often surprisingly incorrect. Therefore, this volume addresses a major gap in contemporary theatre studies. The volume discusses the conflict between tradition and modernity in theatre, suggesting that the problems of modernity are closely related to the idea of tradition. Although Asian countries preserved the traditional form and values of their respective theatres, they had to also confront the newly introduced values or mechanisms of European modernity. Several papers in this volume therefore provide critical surveys of the history of theatre modernization in Asian countries or regions-Japan, Korea, Taiwan, Hong Kong, India Malaysia, Singapore, and Uyghur. Other papers focus on specific case studies of the history of modernization, discussing contemporary Taiwanese performances, translations of modern French comedy into Chinese, the modernization of Chinese Xiqu, modern Okinawan plays, Malaysian traditional performances, Korean national theatre, and Japanese plays during World War II. Renowned academics and theatre critics have contributed to this volume, making it a valuable resource for researchers and students of theatre studies, literature, and cultural studies.
