Vaults and their remedies adopted by researchers working on automobile systems. The book is broadly divided in to three sections, viz. (i) new materials for automotive applications, (ii) new lubricants for automotive applications, and (iii) impact of surface morphologies for automotive applications. The rationale for this division is to provide a comprehensive and categorical review of the developments in automotive tribology. The book covers tribological aspects of engines, and also discusses influence of new materials, such as natural fibers, metal foam materials,

Virtually natural fiber reinforced polymer composites, carbon fiber/silicon nitride polymer composites and aluminium matrix composites. The book also looks at grease lubrication, effectiveness and sustainability of solid/liquid additives in lubrication, and usage of biolubricants. In the last section the book focuses on brake pad materials, shot peening method, surface texturing, magnetic rheological fluid for smart automobile brake and clutch systems, and application of tribology in automobile systems. This book will be of interest to students,

This authoritative volume traces the evolution of the art of warfare in the Greek and Roman worlds between 1600BC and AD 800, from the rise of Mycenaean civilisation to the fall of Ravenna and the eventual decline of the Roman Empire. The book is also, of course, about the great military commanders, such as

industry. Part one discusses identifying and managing hazards on the farm. There are chapters on the prevalence and detection of pathogens, chemical and other contaminants. A number of chapters discuss ways of controlling such hazards in the farm environment. The second part of the book reviews the identification and control of hazards during and after slaughter. There are chapters both on contamination risks and how they can best be managed. The range of decontamination techniques available to meat processors as well as such areas as packaging and storage are examined. With
