Includes Part 1, Number 2: Books and Pamphlets, Including Serials and Contributions to Periodicals July - December)

A Paperback Original. The author who has taught tens of thousands of people to love opera now introduces readers to the rich and soul-stirring world of classical music. For anyone who is aching to discover classical music, this comprehensive and accessible book is the ideal teacher. Writing in the clear and highly entertaining prose that made Opera 101 the standard text in its field, Fred Plotkin -- music expert, teacher, lecturer, and famous author -- presents classical music in a way that respects both the reader and the art form. In Classical Music 101: --The reader will discover how to become an expert listener, which is essential for learning to love classical music. --A thousand years of music are explored, with emphasis on great works in all styles. Significant composers will be profiled in depth, including Beethoven, Mozart, Bach, Tchaikovsky, Dvorak, and many more. --Important musicians, such as pianist Emanuel Ax, singer Marilyn Horne, and conductor James Levine, speak about their art in interviews. Classical Music 101, the newest addition to a highly successful series intended for readers who don't consider themselves dummies or idiots, will help the person drawn to the finer things in life (and readers who don't know how to approach them) discover the glories of music.

In this groundbreaking union of art and science, rocker-turned-neuroscientist Daniel J. Levitin explores the connection between music--its performance, its composition, how we listen to it, why we enjoy it--and the human brain. Taking on prominent thinkers who argue that music is nothing more than an evolutionary accident, Levitin poses that music is fundamental to our species, perhaps even more so than language. Drawing on the latest research and on musical examples ranging from Mozart to Duke Ellington to Van Halen, he reveals: • How composers produce some of the most pleasurable effects of listening to music by exploiting the way our brains make sense of the world • Why we are so emotionally attached to the music we listened to as teenagers, whether it was Fleetwood Mac, U2, or Dr. Dre • That practice, rather than talent, is the driving force behind musical expertise • How those insidious little jingles (called earworms) get stuck in our head A Los Angeles Times Book Award finalist, This Is Your Brain on Music will attract readers of Oliver Sacks and David Byrne, as it is an unprecedented, eye-opening investigation into an obsession at the heart of human nature.

Flexible and integrated, with everything students need to become active listeners.
