This book is the first volume in a three-volume set on Solid Waste Engineering and Management. It provides an introduction to the topic, and focuses on legislation, transportation, transfer station, characterization, mechanical volume reduction, measurement, combustion, incineration, composting, landfilling, and systems planning as it pertains to solid waste management. The three volumes comprehensively discuss various contemporary issues associated with solid waste pollution management, impacts on the environment and vulnerable human populations, and solutions to these problems.

This text series of Water and Wastewater Engineering have been written in a time of mounting urbanisation and industrialisation and resulting stress on water and wastewater systems. Clean and ample sources of water for municipal uses are becoming harder to find and more expensive to develop. The text is comprehensive and covers all aspects of water supply, water sources, water distribution, sanitary sewerage and urban stormwater drainage. This wide coverage is helpful to engineers in their every day practice.

Primarily aimed to be an introductory text for the first course in surveying for civil, architecture and mining engineering students, this book, now in its second edition, is also suitable for various professional courses in surveying. Written in a simple and lucid language, this book at the outset, presents a thorough introduction to the subject. Different measurement errors with their types and nature are described along with measurement of horizontal distances and electronic distances measurements. This text covers in detail the topics in levelling, angles and directions and compass survey. The functions and uses of different instruments, such as theodolites, tacheometers and stadia rods are also covered in the text. Besides, the book elaborates different fields of surveying, such as plane table surveying, topographical surveying, construction surveying and underground surveys. Finally, the book includes a chapter on computer applications in surveying. **KEY FEATURES :** Includes about 400 figures to explain the fundamentals of surveying. Uses SI units throughout the book. Offers more than 170 fully-solved examples including the questions generated from premier universities. Provides a large number of problems and answers at the end of each chapter. Incorporates objective questions from AMIE exams and Indian Engineering Services exams.

Common Aptitude Test or popularly known as CAT is dream and most popular exam amongst students who wants to persue career in management. But as common its name is, it is the toughest exam in India and needs thorough concept clarity and immense practice. CAT, today is doorway to some of the best B-Schools in India and hence thousands of students appear every year for the examination. The current edition of “ Face To Face CAT ” has been carefully and consciously revised to reinforce the conceptual clarity in the aspirants by providing the Sectionwise and Topicwise previous 27 Years ’ (1993-2019) Questions along with the detailed solutions. The book is basically divided into 3 sections; Quantitative Aptitude, Data Interpretation and

Logical Reasoning, and Verbal Ability and Reading Comprehension, which is exactly according to the paper pattern giving the complete coverage of the entire syllabus. 3 Previous Years ' Questions Papers [2019 -2017] are being provided right in the beginning of the book that gives the insight of the pattern of the examination which help candidates to prepare accordingly. Moreover 3 Practice Papers are also attached at the end of the book for thorough practice which also helps to track the self progress. With such voluminous set of questions that too in sectionwise and topicwise manner, it offers a robust tool to attune aspirants with constant self-evaluation to move on the way for success in this exam. TABLE OF CONTENTS Introduction: CAT (About the Exam & How to Succeed in it?), CAT Solved Paper 2019, CAT Solved Paper 2018, CAT Solved Paper 2017, SECTION-I: Quantitative Aptitude, SECTION-II: Data Interpretation and Logical Reasoning, SECTION-III: Verbal Ability and Reading Comprehension, Practice Sets (1-3).

Sustainable Resource Recovery and Zero Waste Approaches covers waste reduction, biological, thermal and recycling methods of waste recovery, and their conversion into a variety of products. In addition, the social, economic and environmental aspects are also explored, making this a useful textbook for environmental courses and a reference book for both universities and companies. Provides a novel approach on how to achieve zero wastes in a society Shows the roadmap on achieving Sustainable Development Goals Considers critical aspects of municipal waste management Covers recent developments in waste biorefinery, thermal processes, anaerobic digestion, material recycling and landfill mining
