Safety focus as road work proceeds: State officials plead for attentive driving as crashes involving ODOT workers rise He was returning from an event to highlight work zone safety when a motorist ...

Butterworths Environmental Law Handbook brings together, in amended form, the main statutory materials relating to the environment, including key EC provisions. The book will be of considerable use to environmental managers and consultants.

Provides all the relevant materials relating to jurisdiction, governing law and the recognition, or enforcement of foreign judgements in the UK.

First published in 1972, Handbook for History Teachers is intended to be a general and comprehensive work of reference for teachers of history in primary and secondary schools of all kinds. The book covers all aspects of teaching history: among them are the use of sources, world history, art and history; principles of constructing a syllabus and the psychological aspects of history teaching. The bibliographical sections are arranged on three parts: school textbooks, a section on audio-visual-aids and, finally, books for the teacher and possibly for the sixth form. It thoroughly investigates and critiques the various methods employed in teaching history within classrooms and suggests alternatives wherever applicable. Diligently curated by the Standing Sub-Committee in History, University of London Institute of Education, the book still holds immense value in the understanding of pedagogy.

The laws on e-commerce are rapidly changing and becoming increasingly important as companies trade more frequently over the internet. This handbook contains materials required by practitioners advising in this area. A list of relevant websites is included.

This unique edited collection derives from an international workshop uniting experts from the transport industry, legislators and research workers. The text focuses on issues from fatigue and their impact on performance and safety. Fatigue and Driving provides an overview of the individual and organisational perspectives of the problem including its many causes and consequences. Transport drivers describe their real-life experience of fatigue and how they identify and manage it; transport managers discuss the demands and constraints on their industry; researchers discuss their current research methodologies and the use of driving simulators.
