Broad in scope, yet precise in exposition, the Sixth Edition of this highly acclaimed ethics text has been infused with new insights and updated material. Richard Johannesen and new coauthors Kathleen Valde and Karen Whedbee provide a thorough, comprehensive overview of philosophical perspectives and communication contexts, pinpointing and explicating ethical issues unique to human communication. Chief among the authors objectives are to: provide classic and contemporary perspectives for making ethical judgments about human communication; sensitize communication participants to essential ethical issues in the human communication process; illuminate complexities and challenges involved in making evaluations of communication ethics; and offer ideas for becoming more discerning evaluators of others communication. Provocative questions and illustrative case studies stimulate reflexive thinking and aid readers in developing their own approach to communication ethics. A comprehensive list of resources spotlights books, scholarly articles, videos, and Web sites useful for further research or personal exploration.

Praised for its teachability, Thinking Through Communication provides an excellent, balanced introduction to basic theories and principles of communication, making sense of a complex field through a variety of approaches. In an organized and coherent manner, Thinking Through Communication covers a full range of topics- from the history of communication study to the methods used by current communication scholars to understand human interaction. The text explores communication in a variety of traditional contexts: interpersonal, group, organizational, public, intercultural, computer-mediated communication and the mass media. This edition also offers new insights into public speaking and listening. This text can be used successfully in both theory- and skills-based courses. Written in a clear, lively style, Trenholm's overall approach-including her use of examples and interesting illustrations-helps both majors and non-majors alike develop a better understanding of communication as a field of study and an appreciation for ways in which communication impacts their daily lives.

Previous editions ('Social Skills in Interpersonal Communication') have established this work as the standard textbook on communication. Directly relevant to a multiplicity of research areas and professions, this thoroughly revised and updated edition has been expanded to include the latest research as well as a new chapter on negotiating. Key examples and summaries have been augmented to help contextualise the theory of skilled interpersonal communication in terms of its practical applications. Combining both clarity and a deep understanding of the subject matter, the authors have succeeded in creating a new edition which will be essential to anyone studying or working in the field of interpersonal communication.

Updated in its 13th edition, Joseph Devito's The Interpersonal Communication Book provides a highly interactive presentation of the theory, research, and skills of interpersonal communication with integrated discussions of diversity, ethics, workplace issues, face-to-face and computer-mediated communication and a new focus on the concept of choice in communication. This thirteenth edition presents a comprehensive view of the theory and research in interpersonal communication and, at the same time, guides readers to improve a wide range of interpersonal skills. The text emphasizes how to choose among those skills and make effective communication choices in a variety of personal, social, and workplace relationships

Personal improvement in communication begins with a clear understanding of your own attitudes and of the relationships you build with others. Human Communication draws the best available research and helps each student, no matter who they are or where they are, to develop the skills needed for effective and confident communication in any occasion. Human Communication is an integrated program that helps students practice communication skills, build confidence in public speaking, and achieve success in their introductory communication course. Always rooted in the most current scholarship and with an eye on practical, everyday communication scenarios, Human Communication is designed to make introductory communication studies immediate and relevant to students. The authors strike a balance of definitive theory and everyday application that resonates with the challenges and goals of today's typical basic course. In the new 7th edition, updated research is integrated throughout the text. Additionally, there is a new focus throughout the text on how communication can help individuals relate in an increasingly polarized world. This edition also discusses fake news within the context of ethical research for a presentation and provides new sample presentation and outline examples. Finally, the new 7th edition will also feature SmartBook 2.0, the first and only adaptive reading experience, that highlights content based on what the individual student knows and doesn ' t know and provides focused help at that moment in need through targeted learning resources (including videos, animations and other interactivities). SmartBook 2.0 ' s intuitive technology optimizes student study time by creating a personalized learning path for improved course performance.

Human Communication: The Basic Course surveys the broad field of human communication, giving attention to theory, research, and skill development. This Twelfth Edition provides an in-depth look at the concepts and principles of human communication, emphasizing public speaking, interpersonal communication, and small group communication. Designed to allow flexibility in teaching approaches, Human Communication: The Basic Course offers instructors a wide range of topics to discuss and apply to real-world experiences.
