This is the story of the Audi TT- one of the biggest motoring sensations of the 1990s. Audi's most exciting car since the original Quattro has won plaudits from the moment of its launch, and has remained hugely popular in spite of question marks over the safety of early versions.James Ruppert tells the complete story of the TT roadster and coupe, in all their versions, finding where the design came from, where it is going to and the impact this little big car has had on the motoring world.

Strife appears endemic to the Balkans. A crossroads of three continents, the area has provided the site for often violent convergence of three of the world's major religions and several major races and a swirl of human activity. This volume explores the battles that have taken place in the region. Beginning with Turkey, the author describes the battles and examines the small arms, artillery, armoured vehicles, warships and warplanes used. Accompanying each weapons illustration throughout the book is a set of specifications providing the tactical abilities of the weapon in the field.

While the history of European competition motorcycles has been largely dominated by Italian, British, and German marques, other builders around the continent have also played significant roles from the turn of the century to present. Arranged by nation, this book examines more than two dozen important marques, including Bultaco, CZ, Elf, Husqvarna, KTM, Ossa, Peugeot, and many others. A wealth of rare photography, including a special color section, includes candid shots of the top personalities and the bikes both at rest and at speed.

"You can be lonely anywhere, but there is a particular flavor to the loneliness that comes from living in a city, surrounded by thousands of strangers. The Lonely City is a roving cultural history of urban loneliness, centered on the ultimate city: Manhattan, that teeming island of gneiss, concrete, and glass. What does it mean to be lonely? How do we live, if we're not intimately involved with another human being? How do we connect with other people, particularly if our sexuality or physical body is considered deviant or damaged? Does technology draw us closer together or trap us behind screens? Olivia Laing explores these questions by travelling deep into the work and lives of some of the century's most original artists, among them Andy Warhol, David Wojnarowicz, Edward Hopper, Henry Darger and Klaus Nomi. Part memoir, part biography, part dazzling work of cultural criticism, The Lonely City is not just a map, but a celebration of the state of loneliness. It's a voyage out to a strange and sometimes lovely island, adrift from the larger continent of human experience, but visited by many - millions, say - of souls"--
