VelocePress, in close cooperation with Brooklands Books Ltd., has brought this and other repair manuals previously published as part of the Autobooks Owners Workshop Manual Series back into print. The series is an invaluable resource for the classic car enthusiast and a must have for owners interested in performing their own maintenance.

Six months after its American introduction in 1985, the Yugo was a punch line; within a year, it was a staple of late-night comedy. By 2000, NPR's Car Talk declared it "the worst car of the millennium." And for most Americans that's where the story begins and ends. Hardly. The short, unhappy life of the car, the men who built it, the men who imported it, and the decade that embraced and discarded it is rollicking and astounding, and one of the greatest untold business-cum-morality tales of the 1980s. Mix one rabid entrepreneur, several thousand "good" communists, a willing U.S. State Department, the shortsighted Detroit auto industry, and improvident bankers, shake vigorously, and you've got *The Yugo: The Rise and Fall of the Worst Car in History*. Brilliantly re-creating the amazing confluence of events that produced the Yugo, Yugoslav expert Jason Vuic uproariously tells the story of the car that became an international joke: The American CEO who happens upon a Yugo right when his company needs to find a new import or go under. A State Department eager to aid Yugoslavia's nonaligned communist government. Zastava Automobiles, which overhauls its factory to produce an American-ready Yugo in six months. And a hole left by Detroit in the cheap subcompact market that creates a race to the bottom that leaves the Yugo . . . at the bottom.

The book examines some of the ways in which contemporary forms of political dissent are situated within processes of global ordering. Grounded in analysis of concrete practices of discipline and dissent in specific contexts, it explores the ways in which resistance can be shaped by dominant ways of thinking, seeing or enacting politics and by the multiform relations of power at play in the making of global order. The contributions, written from a variety of disciplinary backgrounds, address themes such as the processes through which particular sorts of resisting subjects are produced; the politics of knowledge in which resisting practices are embedded; the ways in which visual technologies are deployed within and towards oppositional practices; and the politics of gender, race and class within spaces of contestation. The volume thus opens up space for critical reflection and inter-disciplinary dialogue on what it means to be a resisting subject and on the interplay between the power and counter-power in global order. This book was published as a special issue of *Globalizations*.

This manual gives step-by-step instructions, linked to photos and illustrations to show how to do each job. It covers all Ford Ka models with 1299cc petrol engines and provides tips and shortcuts to make the job easier.
