You will also need a course ID from your instructor to access MyAccountingLab.

"The eighteenth edition of Accounting Standards is intended for Financial Accounting second- or third-year students or students requiring an introduction to accounting standards. It introduces students to the principles of the International Financial Reporting Standards (IFRS). The accounting principles are illustrated through questions which gradually increase in difficulty. This approach facilitates students' understanding of these principles and enables them to get to grips with financial statements in a practical manner. An indication is given when a question contains topics that are not in the revised SAICA syllabus, but may be relevant for other syllabi or for the further enrichment of students' understanding. Accounting Standards is designed to meet students' requirements while at the same time reducing the lecturers' workload. Solutions to all the questions are provided to lecturers at prescribing institutions" -Publisher's description.

While there is growing interest in IFRS within the US, interest outside the US has exploded. Weygandt's fourth edition of Financial Accounting: IFRS highlights the integration of more US GAAP rules, a desired feature as more foreign companies find the United States to be their largest market. The highly anticipated new edition retains each of the key features (e.g. TOC, writing style, pedagogy, robust EOC) on which users of Weygandt Financial have come to rely, while putting the focus on international companies/examples, discussing financial accounting principles and procedures within the context of IFRS, and providing EOC exercises and problems that present students with foreign currency examples instead of solely U.S. dollars.

The text's efficient format does not overwhelm students, and its accessible style provides an alternative to more encyclopedic, reference-book approaches. The book offers a blend of the core concepts of accounting principles with procedural applications. This approach is supplemented with the most expansive set of end-of-chapter material on the market, a thorough integration of today's hot topics, and a robust selection of student and instructor print and online resources. Important Notice: Media content referenced within the product description or the product text may not be available in the eBook version.

This proceedings volume analyzes the impact of globalization on international financial flow as well as harmonized financial reporting. Featuring contributions presented at the 18th Annual Conference on Finance and Accounting held at the University of Economics in Prague, this book examines the economic consequences of the globalized world in the sphere of corporate and public finance, monetary systems, banking, financial reporting and management accounting. The global perspective is accompanied by local specific cases studies, including those from emerging markets. In addition, the combination of micro- and macroeconomic approaches provide insights on the behavior of all relevant stakeholders in the process and the results of dynamic pressures surrounding global capital markets and international investments. This book will serve as a useful resource for scholars and researchers, practitioners and policy makers in the fields of finance, economics and accounting.

Using real-world examples to thoroughly involves readers with financial statements, Financial Reporting and Analysis, 9e builds skills in analyzing real financial reports through statements, exhibits, and cases of actual companies. Emphasis is placed on the analysis and interpretation of the end result of financial reporting à € " financial statements.
