of the Impreza, from concept through to the current production car, looking at the rally machines along the way, and illustrated throughout with contemporary material. Now with over 400 mainly color pictures and significant additional text, this is a fantastic warts and all account of an amazing car.

At last. A practical handbook on how to choose and operate datalogging equipment and get the full benefit from what it tells you. Aimed at the amateur competitor, it covers hardware and software and takes over where the manufacturers instructions run out. It shows how to understand what the data is telling you and how to use it to go faster. It covers standard information screens and shows you how to create your own charts and tables that will illuminate the performance of both the car, the driver and the team. On the way, it deals with systems management issues, how to get the quick and easy payoffs, and how to benefit in the long term. It explains how sensors work, how to fit them so they survive and to calibrate them. The final chapter is a Field Guide designed to help you run the system, trouble-shoot hardware and software problems and quickly interpret the output of the graphs under pressure during an event.

Covers all aspects of modifying the MG Midget and Austin Healey Sprite for high performance. Includes engine/driveline, suspension, brakes, and much more. with 400 mainly colour photos and exclusive tuning advice, this is a MUST for any Sprite or Midget owner.

When Fiat entered rallying in 1970, its ultimate aim was to become World Rally Champion and the 131 Abarth of 1976-1980 provided the machinery to make that possible. It started winning World rallies within months of being launched, and in 1977, 1978 and 1980 the 'works' team also won the World Championship for Makes, and set every standard by which Rally Giants were to be judged. Was there ever any doubt that successors like the Lancia Rally 037 and the Delta Integrale would eventually come from the same stable?

A fascinating and nostalgic compilation of rider profiles written over a three year period, which originally appeared in Classic Motorcycle magazine, and is now accompanied by a new set of over 100 photographs. All of the riders featured became top achievers in their field, although, for some, it was their

first interview. During the 1950s and 60s, scrambling especially drew huge crowds to meetings all across the country, and, thanks to TV coverage such as BBC Grandstand Trophy, and ITV's World of Sport, many of the competitors featured in this book became household names. Each chapter includes the competition years of the riders, and also gives an overview of their careers, and conveys their enthusiasm for the sport.

A young Londoner had only one ambition in life - to work with motorcycles. That simple wish led to an apprenticeship that was to change Bill Cakebread's life forever as the training that Associated Motorcycles Limited provided enabled achievements that he never dreamed possible. This book gives a unique insight to the atmosphere and excitement of working in a motorcycle factory. It is an inspiring story, supported by a host of period photographs and rare documents, which provides a fascinating record of work within the British motorcycle industry in the final years of its decline into oblivion.

The Escort RS Cosworth, which began rallying in 1993, was one of the most ingenious designs of all time, and eventually became Ford's most successful model since the legendary Escorts of the 1970s. The combination of Cosworth power, four-wheel-drive transmission, and an effective aerodynamic package made it a Rally Giant in

all conditions, and, until the all-new Focus WRC was launched in 1999, this generation of Escorts was the most effective rally car that Ford had ever produced.

This book covers the full history of the Porsche 928, looking at the variants sold on the domestic, American, British, Australian and Japanese markets, from the time the car was launched in 1977 until the last one was built in 1995.

This is a study of how the first Turbo Grand Prix car came to be a reality, from the first ideas to the final ultimate success of a Grand Prix victory. Includes the history of each company involved, the reasons for the creation of the first Turbo-charged Grand Prix car. The book covers the development of an experimental car by Alpine in the 1960's. Of the men who worked with Gordini the engine tuning genius and who went on to create a power unit that changed the worlds thinking on engine design. Then Renault designed and built its Grand Prix car to the specific Formula 1 regulations. It goes on to cover the full story of the period of the Renault Turbo Grand Prix cars.
