Every trader wants to know how to trade without losses. Unfortunately, we all do mistakes. Sometimes it seems like we've made a genius decision, but later we find out that it was impossible to take a decision more stupid than this one.It's possible to trade without loses at all, and minimize the risks. Professionalism in the currency trading market is not impossible.The professional trading process is a trading process based on laws and obligations, the trader must start applying it step by step.This is a hellish strategy that I always follow for trading in Forex, its a powerful strategy that you cannot lose using it even a single cent even in the worst fluctuations in global markets, even that if something went wrong then the margin of loss will be very little, because the strategy has a safety valve to ensure its success.

Jim's FOREX books are consistently ranked BEST SELLERS on Amazon and there is a very good reason for this. Jim, from Queensland Australia, is a full-time Forex Trader and currently resides in Vietnam. This book will provide you with a reliable and robust trading method which Jim has refined via manual testing, demo testing and live trading. Jim's High Probability Trading Method can be traded on any time frame you choose. He has a personal preference for the 4hr charts or the daily charts as these are time frames he is comfortable with but of course, he acknowledges that there are different strokes for different folks when it comes to time availability, preferred time-frames, lifestyle choices etc. You many not wish to conduct your actual trading off an MT4 platform, however as this method relies on the use of Jim's indicators which he arranged to be specifically built for the platform, you will need to at least download a free MT4 demonstration version to enable you to conduct your trade analysis, and then place your actual trades on your preferred Broker's platform. Although Jim concentrates solely on Forex trading, there is no reason why you could not trade this method on other financial instruments offered by many MT4 brokers such as Bitcoin, Oil, Precious metals, Commodities, Stock Indices, Individual stocks. Some even consider Divergence to be a leading indicator. Basically, it is the difference between what the actual price on the chart is doing and what an Oscillator type indicator is doing. This book will use the same principles as his MT4 High Probability Forex Trading Method, but it is a stand-alone book and concentrates more on trading with Divergence. Jim has no affiliation with any links included in the book and there are no up-sells or ongoing costs for this method, his custom indicators, template etc. Also worthy of mention is that this Method can be used with any other financial instrument that your MT4 platform offers. However the author covered concepts and principles in very direct and easy to understand manner. I have read other authors that would have no doubt used three times the verbiage and none of the clarity possessed by Jim Brown. All in all I am very pleased with my purchase. - Darrell R Allen Buy "Forex for Dummies" or something similar for a detailed background of Forex, then buy this book. I'm going to show you how to CRUSH financial markets using a simple Money Management System that reduces your risk while maximizing profits! While this system may focus on FOREX trading and the casino game Roulette, it can be applied to trading ANY financial market, including stocks, commodities, and binary options. I was inspired to develop this system after a horrible night in Las Vegas where I lost \$2000 playing Roulette with a betting system that I thought was unbeatable. I spent the following 12 years reverse engineering everything that went wrong that dreadful night

and developed what I discovered into a simple and powerful Money Management system that makes it easy for anyone to CRUSH financial markets like a professional gambler! After developing this system, I returned to Las Vegas and turned \$20 into \$500 in about 1 hour at the roulette table, and that was down from a high of \$750. The \$500 profit that I walked away with was locked in from the profit-locking mechanism, like a gear that spins freely in one direction but quickly locks in the opposite direction. In January 2015, I had this system programmed into an MT4 Forex Trading Robot so I could automate the entire system (signals, trade execution, and money management). After a few weeks of little activity, the market sprang to life and so did my system! My account doubled in about 48 hours and that's when I knew I had developed something very special. But my trading robots are NOT required to use this system. It can be applied manually to virtually ANY trading system in ANY market and even on casino games like Roulette, although you will get much better results in financial markets where you can have far better statistics than a casino game. So come join me and I'll open a whole new dimension of trading and opportunities for BIG PROFITS that you have never noticed before!
