Memrise is another free language learning app. It's not as smooth as Duolingo, but it is easy to work with, supports offline courses, and lets you learn a massive number of languages. You can start off simple or skip all the way through to more advanced lessons. Something unique about Memrise is how it teaches you new words and phrases.

A surprisingly simple way for students to master any subject--based on one of the world's most popular online courses and the bestselling book A Mind for Numbers A Mind for Numbers and its wildly popular online companion course "Learning How to Learn" have empowered more than two million learners of all ages from around the world to master subjects that they once struggled with. Fans often wish they'd discovered these learning strategies earlier and ask how they can help their kids master these skills as well. Now in this new book for kids and teens, the authors reveal how to make the most of time spent studying. We all have the tools to learn what might not seem to come naturally to us at first--the secret is to understand how the brain works so we can unlock its power. This book explains: • Why sometimes letting your mind wander is an important part of the learning process • How to avoid "rut think" in order to think outside the box • Why having a poor memory can be a good thing • The value of metaphors in developing understanding • A simple, yet powerful, way to stop procrastinating Filled with illustrations, application questions, and exercises, this book makes learning easy and fun.

To reach the highest standards of instrumental performance, several years of sustained and focused learning are required. This requires perseverance, commitment and opportunities to learn and practise, often in a collective musical environment. This book brings together a wide range of enlightening current psychological and educational research to offer deeper insights into the mosaic of factors and related experiences that combine to nurture (and sometimes hinder) advanced musical performance. Each of the book's four sections focus on one aspect of music performance and learning: musics in higher education and beyond; musical journeys and educational reflections; performance learning; and developing expertise and professionalism. Although each chapter within its home section offers a particular focus, there is an underlying conception across all the book's contents of the achievability of advanced musical performance and of the important nurturing role that higher education can play, particularly if policy and practice are evidence-based and draw on the latest international research findings. The narrative offers an insight into the world of advanced musicians, detailing their learning journeys and the processes involved in their quest for the development of expertise and professionalism. It is the first book of its kind to consider performance learning in higher education across a variety of musical genres, including classical, jazz, popular and folk musics. The editors have invited an international community of leading scholars and performance practitioners to contribute to this publication, which draws on meticulous research and critical practice. This collection is an essential resource for all musicians, educators, researchers and policy makers who share our interest in promoting the development of advanced performance skills and professionalism.

"This book focuses on Hybrid Learning as a way to compensate for the shortcomings of traditional face-to-face teaching, distance learning, and technology-mediated learning"--Provided by publisher.

Examines the need for advanced levels of language learning from socio-cultural and linguistic perspectives.

This book presents the refereed proceedings of the 5th International Conference on Advanced Machine Learning Technologies and Applications (AMLTA 2020), held at Manipal University Jaipur, India, on February 13 – 15, 2019, and organized in collaboration with the Scientific Research Group in Egypt (SRGE). The papers cover current research in machine learning, big data, Internet of Things, biomedical engineering, fuzzy logic and security, as well as intelligence swarms and optimization.

The BPP Study Text provides a comprehensive treatment of the updated ACCA syllabus for P4. It addresses all learning outcomes and the higher skills required in an integrated and practical way. The material, despite the technical nature of certain areas, follows a practical, common sense approach with plenty of case studies and real life business examples. The key points of each topic are summarised in a chapter roundup and tested in a diagnostic quiz at the end of each chapter. A question bank at the end of the book provides practice on exam style questions.

This book illuminates the complexities of social and emotional learning (SEL) during early childhood and provides readers with supportive tools to enhance and advance social and emotional skills among young children within their homes and classrooms. Affective development is critical to childhood development – this guide gives parents and educators concrete strategies to support students' social skills, relationship development, and positive mental health. Expertly blending theory with practice, Social and Emotional Learning for Advanced Children in Early Childhood: Birth to 8 presents vital background information, real-life examples, diverse case studies, discussion questions, and action steps for implementing SEL into any early childhood environment. By including both what is understood about social and emotional development in early childhood as well as the proven methods and approaches for working with young children, this comprehensive guide is a must read for all adults striving to make a positive impact in early childhood development.

"This book offers an examination of technology-based design, development, and collaborative tools for the classroom"--Provided by publisher.

This book presents the refereed proceedings of the third International Conference on Advanced Machine Learning Technologies and Applications, AMLTA 2018, held in Cairo, Egypt, on February 22–24, 2018, and organized by the Scientific Research Group in Egypt (SRGE). The papers cover current research in machine learning, big data, Internet of Things, biomedical engineering, fuzzy logic, security, and intelligence swarms and optimization.
