First published in 1989 as Tuning New Generation Engines, this best-selling book has been fully updated to include the latest developments in four-stroke engine technology in the era of pollution controls, unleaded and low-lead petrol, and electronic management systems. It explains in non-technical language how modern engines can be modified for road and club competition use, with the emphasis on power and economy, and how electronic management systems and emission controls work.

Highly detailed maintenance and repair instructions for service supervisors, qualified & less experienced mechanics.

The aim of this book, with its superb step by step photographs and detailed diagrams is to enable every owner to understand the workings of an outboard motor (2 or 4 stroke) and be able to fix it with relative ease. It includes: an explanation of the different parts that make up the engine and how they interact; how fuel is transformed into propulsion; regular maintenance and repair worksheets to help even the most mechanically ignorant to work on their outboard engine with confidence; the most common causes of breakdown; troubleshooting tables to allow you to diagnose and fix the most common engine problems and advice on how to winterize your outboard in one short afternoon. After reading this book, your outboard will no longer be a potential bother to you but an ally for better boating.

Large-format, week-to-view presentation. Featuring classic Haynes car cutaways from company archives. Appendices of useful automotive-related data. Robust binding in laminated board to endure hard day-to-day use. Handy marker ribbon. This year we are celebrating the centenary of the RAF, with the front cover featuring the illustration from our Spitfire Manual.

A complete and fully illustrated repair manual for the Swiss-made Interapid test indicators. Includes parts drawings, parts list, contact point list, required tools. Detailed disassembly, cleaning, reassembly and special repair situations are documented with photographs and are carefully explained. Based on 36 years of personal experience in the repairs of these classic European measuring instruments.
