A little more than seventy-five years ago, Kate L. Turabian drafted a set of guidelines to help students understand how to write, cite, and formally submit research writing. Seven editions and more than nine million copies later, the name Turabian has become synonymous with best practices in research writing and style. Her *Manual for Writers* continues to be the gold standard for generations of college and graduate students in virtually all academic disciplines. Now in its eighth edition, *A Manual for Writers of Research Papers, Theses, and Dissertations* has been fully revised to meet the needs of today's writers and researchers. The *Manual* retains its familiar three-part structure, beginning with an overview of the steps in the research and writing process, including formulating questions, reading critically, building arguments, and revising drafts. Part II provides an overview of citation practices with detailed information on the two main scholarly citation styles (notes-bibliography and author-date), an array of source types with contemporary examples, and detailed guidance on citing online resources. The final section treats all matters of editorial style, with advice on punctuation, capitalization, spelling, abbreviations, table formatting, and the use of quotations. Style and citation recommendations have been revised throughout to reflect the sixteenth edition of *The Chicago Manual of Style*. With an appendix on paper format and submission that has been vetted by dissertation officials

Since the first MOOC was launched at the University of Manitoba in 2008, this new form of the massification of higher education has been a rollercoaster ride for the university sector. The *New York Times* famously declared 2012 to be the year of the MOOC. However, by 2014, the number of academic leaders who believed the model was unsustainable doubled to more than 50%. While the MOOC hype has somewhat subsided, the attitudes and anxieties of this peak time can still be seen influencing universities and their administrations. This is the first volume that addresses Massive Open Online Courses from a post-MOOC perspective. We move beyond the initial hype and revolutionary promises of the peak-MOOC period and take a sober look at what endures in an area that is still rapidly growing, albeit without the headlines. This book explores the future of the MOOC in higher education by examining what went right, what went wrong and where to next for the massification of higher education and online learning and teaching. The chapters in this collection address these questions from a wide variety of

different backgrounds, methodologies and regional perspectives. They explore learner experiences, the move towards course for credit, innovative design, transformations and implications of the MOOC in turn. This book is valuable reading for students and academics interested in education, eLearning, globalisation and information services.

The Elements of Style is an American English writing style guide in numerous editions. The original was composed by William Strunk Jr. in 1918, and published by Harcourt in 1920, comprising eight "elementary rules of usage", ten "elementary principles of composition", "a few matters of form", a list of 49 "words and expressions commonly misused", and a list of 57 "words often misspelled". E. B. White greatly enlarged and revised the book for publication by Macmillan in 1959. That was the first edition of the so-called Strunk & White, which Time named in 2011 as one of the 100 best and most influential books written in English since 1923.
