"French for Reading Knowledge presents a plan to teach the reading of French directly and economically. This book is not intended for those interested in acquiring a practical speaking knowledge. It is meant to reach that large number of students, college freshmen or graduates, who would like to acquire a reading knowledge of French if they could only have the time. It fills a gap. It replaces no other text. French for Reading Knowledge differs from the traditional, as well as the current oral-aural type of text. It differs in aim, approach, teaching technique, vocabulary, reading material, etc. How it

differs cannot be told here because a short description would be inadequate, and a long one would be read only by those who do not need to read it. In view of this, we should like to make but one brief comment: the basic vocabulary, basic for reading only and extremely small, includes those words which the student will need for further reading in any field. There are a few words, though, which are not generally basic. Obviously, they had to be included for practical purposes. We wish to thank Professor Casimir D. Zdanowicz, who foresaw in an Extension reading course the development of a new method and offered valuable suggestions for the preparation of this book. We are grateful to Dr. Lorentz H. Adolfson, Director of the Extension Division, and to Dr. W. M. Hanley, also of the Extension Division, for continuous professional support and encouragement. We are grateful, too, to Mlle Germaine Mercier and to Mme

Excerpt from The Mastery of French, Direct Method, Vol. 1: A Series of Lessons, Including a Simple Key to Pronunciation, Which Will Enable the Student to Read and Understand the Language, and Through His Power to Speak Correctly, Will Give Him the Confidence to Express His Thoughts in French Most French sounds have their equivalents in English sounds which the student is using every day. If, then, he can be led to see that the appalling French (3 is really his own familiar e in egg, that the French e has the sound of a in fate and that most of the consonants have the same sounds in both languages, he will realize that his tongue has no need to learn a new cunning. When he appreciates the many equivalent sounds of the two languages and has fixed in mind the English type words

which give the key to the French sounds, he has acquired a basis for independence in French pronunciation. With this foundation and with constant and repeated drill his confidence in his ability to pronounce will increase rapidly. When the teacher pronounces a word, he can picture it. The pronunciation of new words will offer little difficulty. The simple Key to French pronunciation which is given in the introductory part of this volume will prove a short cut to rapid progress. Its mastery will enable a student to apply the Direct Method from the start in a way which cannot help securing results in the shortest possible time, in understanding, in speaking and in thinking in French.
