Fresh Fruit, Broken Bodies provides an intimate examination of the everyday lives and suffering of Mexican migrants in our contemporary food system. An anthropologist and MD in the mold of Paul Farmer and Didier Fassin, Seth M. Holmes shows how market forces, anti-immigrant sentiment, and racism undermine health and health care.

Fresh Fruit, Broken Bodies: Migrant Farmworkers in the ...

Fresh Fruit, Broken Bodies: Migrant Farmworkers in the United States. This book is an ethnographic witness to the everyday lives and suffering of Mexican migrants. Based on five years of research in the field (including berry-picking and traveling with migrants back and forth from Oaxaca up the West Coast), Holmes, an anthropologist and MD in the mold of Paul Farmer and Didier Fassin, uncovers how market forces, anti-immigrant sentiment, and racism undermine health and health care.

Fresh Fruit, Broken Bodies: Migrant Farmworkers in the ...

Fresh Fruit, Broken Bodies is far more than an ethnography or supplementary labor studies text; Holmes tells the stories of food production workers from as close to the ground as possible, revealing often theoretically-discussed social inequalities as irreparable bodily damage done.

Fresh Fruit, Broken Bodies: Migrant Farmworkers in the ...

Fresh Fruit, Broken Bodies is an ethnographic study of indigenous Triqui migrants from Oaxaca, Mexico, who move to the United States to work in the fields of central California and the Skagit Valley in Washington State. This detailed and bravely insightful ethnography will frustrate readers looking for a clear research question and straightforward answers, but is remarkably rewarding for the depth, insight, and theoretical framing of migrant farm work in the United States and, in particular ...

Fresh Fruit, Broken Bodies : Migrant Farmworkers in the ...

Seth Holmes' ethnography Fresh Fruit, Broken Bodies is a timely and innovative text blending theory and praxis. As a physician anthropologist, the author tries to better understand the socio-cultural and political economic factors shaping the conditions in which Indigenous Oaxacan migrants live, labour, suffer, and treat their physical ailments. Holmes guides the reader through this endeavor by providing an intense blend of informant life histories, their clinical case studies ...

#Review: Fresh Fruit, Broken Bodies: Migrant Farmworkers ...

Fresh Fruit, Broken Bodies. This project investigates social hierarchies, health, health care and the naturalization and normalization of difference and inequality in the context of US-Mexico im/migration and transnational agro-food systems. The research was conducted in collaboration with indigenous Mexican immigrant communities and families.

"Based on five years of research in the field (including berry-picking and traveling with migrants back and forth from Oaxaca up the West Coast), Holmes, an anthropologist and MD in the mold of Paul Farmer and Didier Fassin, uncovers how market forces, anti-immigrant sentiment, and racism undermine health and health care."--From publisher description.

Fresh Fruit, Broken Bodies provides an intimate examination of the everyday lives and suffering of Mexican migrants in our contemporary food system. An anthropologist and MD in the mold of Paul Farmer and Didier Fassin, Holmes shows how market forces, anti-immigrant sentiment, and racism undermine health and health care. Holmes's material is visceral and powerful. He trekked with his companions illegally through the desert into Arizona and was jailed with them before they were deported. He lived with indigenous families in the mountains of Oaxaca and in farm labor camps in the U.S., planted and harvested corn, picked strawberries, and accompanied sick workers to clinics and hospitals. This ||embodied anthropology|| deepens our theoretical understanding of the ways in which social inequalities and suffering come to be perceived as normal and natural in society and in health care. All of the book award money and royalties from the sales of this book have been donated to farm worker unions, farm worker organizations and farm worker projects in consultation with farm workers who appear in the book.

This book is an ethnographic witness to the everyday lives and suffering of Mexican migrants. Based on five years of research in the field (including berry-picking and traveling with migrants back and forth from Oaxaca up the West Coast), Holmes, an anthropologist and MD in the mold of Paul Farmer and Didier Fassin, uncovers how market forces, anti-immigrant sentiment, and racism undermine health and health care. Holmes' material is visceral and powerful?for instance, he trekked with his informants illegally through the desert border into Arizona, where they were apprehended and jailed by the Border Patrol. After he was released from jail (and his companions were deported back to Mexico), Holmes interviewed Border Patrol agents, local residents, and armed vigilantes in the borderlands. He lived with indigenous Mexican families in the mountains of Oaxaca and in farm labor camps in the United States, planted and harvested corn, picked strawberries, accompanied sick workers to clinics and hospitals, participated in healing rituals, and mourned at funerals for friends. The result is a "thick description" that conveys the full measure of struggle, suffering, and resilience of these farmworkers. Fresh Fruit, Broken Bodies weds the theoretical analysis of the anthropologist with the intimacy of the journalist to provide a compelling examination of structural and symbolic violence, medicalization, and the clinical gaze as they affect the experiences and perceptions of a vertical slice of indigenous Mexican migrant farmworkers, farm owners, doctors, and nurses. This reflexive, embodied anthropology deepens our theoretical understanding of the ways in which socially structured suffering comes to be perceived as normal and natural in society and in health care, especially through imputations of ethnic body difference. In the vehement debates on immigration reform and health reform, this book provides the necessary stories of real people and insights into our food system and health care system for us to move forward to fair policies and solutions.

Based on ethnographic fieldwork from Santa Barbara, California, this book sheds light on the ways that food insecurity prevails in women's experiences of migration from Mexico and Central America to the United States. As women grapple with the pervasive conditions of poverty that hinder efforts at getting enough to eat, they find few options for alleviating the various forms of suffering that accompany food insecurity. Examining how constraints on eating and feeding translate to the uneven distribution of life chances across borders and how ||food security|| comes to dominate national policy in the United States, this book argues for understanding women's relations to these processes as inherently biopolitical.

Financial collapses!whether of the junk bond market, the Internet bubble, or the highly leveraged housing market!are often explained as the inevitable result of market cycles: What goes up must come down. In Liquidated, Karen Ho punctures the aura of the abstract, all-powerful market to show how financial markets, and particularly booms and busts, are constructed. Through an in-depth investigation into the everyday experiences and ideologies of Wall Street investment bankers, Ho describes how a financially dominant but highly unstable market system is understood, justified, and produced through the restructuring of corporations and the larger economy. Ho, who worked at an investment bank herself, argues that bankers' approaches to financial markets and corporate America are inseparable from the structures and strategies of their workplaces. Her ethnographic analysis of those workplaces is filled with the voices of stressed first-year associates, overworked and alienated analysts, undergraduates eager to be hired, and seasoned managing directors. Recruited from elite universities as ||the best and the brightest,|| investment bankers are socialized into a world of high risk and high reward. They are paid handsomely, with the understanding that they may be let go at any time. Their workplace culture and networks of privilege create the perception that job insecurity builds character, and employee liquidity results in smart, efficient business. Based on this culture of liquidity and compensation practices tied to profligate deal-making, Wall Street investment bankers reshape corporate America in their own image. Their mission is the creation of shareholder value, but Ho demonstrates that their practices and assumptions often produce crises instead. By connecting the values and actions of investment bankers to the construction of markets and the restructuring of U.S. corporations, Liquidated reveals the particular culture of Wall Street often obscured by triumphalist readings of capitalist globalization.

Collects portraits of migrant workers, union organizers, the people who smuggle others across the border, physicians, children, and their families back in Mexico.

In his gripping and provocative debut, anthropologist Jason De León sheds light on one of the most pressing political issues of our time!the human consequences of US immigration policy. The Land of Open Graves reveals the suffering and deaths that occur daily in the Sonoran Desert of Arizona as thousands of undocumented migrants attempt to cross the border from Mexico into the United States. Drawing on the four major fields of anthropology, De León uses an innovative combination of ethnography, archaeology, linguistics, and forensic science to produce a scathing critique of ||Prevention through Deterrence,|| the federal border enforcement policy that encourages migrants to cross in areas characterized by extreme environmental conditions and high risk of death. For two decades, this policy has failed to deter border crossers while successfully turning the rugged terrain of southern Arizona into a killing field. In harrowing detail, De León chronicles the journeys of people who have made dozens of attempts to cross the border and uncovers the stories of the objects and bodies left behind in the desert. The Land of Open Graves will spark debate and controversy.

Chile is widely known as the first experiment in neoliberalism in Latin America, carried out and made possible through state violence. Since the beginning of the transition in 1990, the state has pursued a national project of reconciliation construed as debts owed to the population. The state owed a "social debt" to the poor accrued through inequalities generated by economic liberalization, while society owed a "moral debt" to the victims of human rights violations. *Life in Debt* invites us into lives and world of a poor urban neighborhood in Santiago. Tracing relations and lives between 1999 and 2010, Clara Han explores how the moral and political subjects imagined and asserted by poverty and mental health policies and reparations for human rights violations are refracted through relational modes and their boundaries. Attending to intimate scenes and neighborhood life, Han reveals the force of relations in the making of selves in a world in which unstable work patterns, illness, and pervasive economic indebtedness are aspects of everyday life. Lucidly written, *Life in Debt* provides a unique meditation on both the past inhabiting actual life conditions but also on the difficulties of obligation and achievements of responsiveness.

Burnout is common among doctors in the West, so one might assume that a medical career in Malawi, one of the poorest countries in the world, would place far greater strain on the idealism that drives many doctors. But, as *A Heart for the Work* makes clear, Malawian medical students learn to confront poverty creatively, experiencing fatigue and frustration but also joy and commitment on their way to becoming physicians. The first ethnography of medical training in the global South, Claire L. Wendland's book is a moving and perceptive look at medicine in a world where the transnational movement of people and ideas creates both devastation and possibility. Wendland, a physician anthropologist, conducted extensive interviews and worked in wards, clinics, and operating theaters alongside the student doctors whose stories she relates. From the relative calm of Malawi's College of Medicine to the turbulence of training at hospitals with gravely ill patients and dramatically inadequate supplies, staff, and technology, Wendland's work reveals the way these young doctors engage the contradictions of their circumstances, shedding new light on debates about the effects of medical training, the impact of traditional healing, and the purposes of medicine.

In her timely new book, Teresa M. Mares explores the intersections of structural vulnerability and food insecurity experienced by migrant farmworkers in the northeastern borderlands of the United States. Through ethnographic portraits of Latinx farmworkers who labor in Vermont's dairy industry, Mares powerfully illuminates the complex and resilient ways workers sustain themselves and their families while also serving as the backbone of the state's agricultural economy. In doing so, *Life on the Other Border* exposes how broader movements for food justice and labor rights play out in the agricultural sector, and powerfully points to the misaligned agriculture and immigration policies impacting our food system today.
