Research in this book focuses on the strategic behaviour of the State as a shareholder in businesses, and the implications it has for the other shareholder(s) and business performance. It investigates the institutional characteristics of State-linked and State-owned firms (SIEs & SOEs), in emerging markets using Vietnam as a case study with comparative analysis on China and

selected ASEAN countries. In doing so, the book adopts an evidence-based approach to explain the State's role as a shareholder in the different aspects of corporate governance, including CEO appointment, board structure and impact of State ownership on business strategy and performance. It highlights the influence of the State as a shareholder by investigating institutional factors consistent with "path dependence" theory, which postulates that the initial and underlying structure of an economy influences its performance. In addition, the book presents empirical evidence of the dynamics of corporate governance arising from interactions between the State and other shareholders, which has not yet been addressed in the literature, and is distinctive in providing new insights from both qualitative and empirical research on how to successfully navigate the emerging

market business environments from the perspective of the State as an “owner-participant”. Explaining the theoretical constructs in corporate governance in State-invested firms, empirical research methodologies, and results to draw and validate inferences, the book is comprehensive and provides a practical guide for practitioners as well as a reference for academics, undergraduate and postgraduate students. The new theoretical models proposed integrate traditional political-economic and agency theories, which also underpin tertiary business courses and academic research.

"Impressive book for finance professionals - Probably the best recently published Corporate Finance book with a truly European emphasis. The balance between theory and practice makes this book an excellent tool for Investment Bankers and other finance professionals, as it covers both basic as well as more sophisticated topics. Particularly impressive is their commitment to continuously updating material, as well as the regular publication of a newsletter containing timely articles on various current finance topics. The possibility of asking questions to the authors and effectively receiving in-depth answers for free is a very valuable feature. I sincerely recommend this text."

I finally bought the book, and I have not been disappointed: the style is clear, very practical ; theories are mixed with real cases, which makes them easy to understand. Valuation techniques are well explained (discounted cash flow methods, methods based on ratios). Fundamental concepts (accounting, finance, financial markets) are recalled in the first part; when more complex concepts are tackled (investment analysis, LBOs, capital structure...), they are explained with lots of simplicity and conciseness. I recommend this book for every student in Management or Finance!" Amazon.co.uk 30 July 2005
