Human Biology  
Made Simple is an  
introductory work  
on the study of  
biology in relation  
to people and the  
interdependence of  
all living things.

This book is  
organized into three  
parts encompassing  
31 chapters. Part 1  
deals with the  
people and the

“ Embarking on one ’ s memoirs might seem on the surface a terribly pretentious and self-indulgent thing to do. After all, I ’ m not a B-list celebrity, a politician or a minor sports star. I haven ’ t trekked to the South Pole, or

I ' ve lived what  
could typically be  
described as an

yet within that  
ordinary life, there  
lurks a story. My  
story. ” Angela  
Norris ' memoir,  
Dancing to the Beat

of the Tide, tells the story of one girl ' s growing up in a small sleepy seaside town in the sixties and seventies, against a vibrant background of music, fashion and the emerging disco era. As a child growing up in the Knott End and later nearby Pilling, on

Lancashire 's  
breezy coast,  
Angela enjoyed an  
idyllic childhood,  
playing on the  
beach, riding ponies  
and going out for  
tea. As disco fever  
swept the country  
in the early  
seventies, she and  
her friends thought  
they were pop  
fashion princesses

in their hot pants,  
ready to dance to  
the music of T.Rex.  
Angela then goes  
on to explore life at  
secondary school  
and reflects back on  
reading Jackie  
magazine,  
dispensing its  
wisdom like a big  
sister. Not to  
mention listening to  
Rod Stewart after

school, as he  
grinned from his  
poster on the  
bedroom wall.

Whilst Angela  
remembers her  
childhood, she also  
introduces readers  
to a shy blond-  
haired boy who  
becomes pivotal to  
Angela ' s story...  
Dancing to the Beat  
of the Tide will

appeal to fans of  
memoirs and also  
those who have a  
local interest in  
Lancashire.

Angela ' s work will  
also be enjoyed by  
those who grew up  
in the sixties and  
seventies and would  
like to look back on  
the society at the  
time.
