The discipline of Sociology has a rich history of including spatial context in the analysis of social issues. Much of this history has revolved around the development and application of spatial theory aimed at understanding the geographic distribution of social problems, the organization of communities, and the relationship between society and the environment. More recently, the social sciences have seen a large number of technological innovations that now make it possible to place social behaviour in spatial context. Consequently, because of the historical disjuncture in the development of spatial theory and the recent development of relevant methodological tools, the relationship between materials describing both the methodological approaches and their theoretical importance a scattered throughout various books and articles. Geographical Sociology consolidates these materials into a single accessible source in which spatial concepts such as containment, proximity, adjacency, and others are examined in relation to such methodological tools as hierarchical linear models, point pattern analysis, and spatial regression. As these methods continue to increase in popularity among social scientists the ability to more generally understand societies relationship to geographic space will continue to increase in it importance in the field. This book represents a starting point to linking these concepts to practice and is presented in an accessible form in which students, researchers, and educators can all learn, and in turn, contribute to its development.

"This handbook brings together essays by leading contributors to development sociology by addressing intellectual challenges: internal and international migration, transformation of political regimes, globalization, changes in household and family formations, gender dynamics, technological change, population and economic growth, environmental sustainability, peace and war, and the production and reproduction of social and economic inequality. The Sociology of Development Handbook includes essays that reflect the range of debates in development sociology and in the interdisciplinary study and practice of development"--Provided by publisher.

A world-class introduction to the historical and continuing impact of classical theory on sociological debate The latest edition of Classical Sociological Theory offers students a definitive guide to the theoretical foundations of sociology and the continuing impact of the ideas explored by early theorists, including Marx, Durkheim, Weber, Mead, Simmel, Freud, Du Bois, Adorno, Marcuse, Parsons, and Merton. The prestigious editors have integrated several readings on the most influential theories arising out of the Enlightenment era and the work of de Tocqueville. Readers are introduced to seminal works in classical sociological theory by way of editorial introductions that lend historical and intellectual perspective to the included readings. The readings themselves have been selected based on their combinations of theoretical sophistication and accessibility. From analyses of self and society to examinations of critical theory and structural-functional analysis, Classical Sociological Theory remains the gold standard in classical theory readers. The Fourth Edition of this widely taught book includes: Selections that trace the history of classical sociological theory, from its undisciplined roots to its modern influence on contemporary sociological debate Readings describing the "pre-history" of sociology, including ideas from the Enlightenment and de Tocqueville Editorial introductions that place selected works firmly in their intellectual, philosophical, and historical contexts for the benefit of the student A distinguished and scholarly team of editors with a wide and deep range of expertise Perfect for undergraduate and graduate students of social and sociological theory, Classical Sociological Theory is also a thought-provoking resource ideal for use in courses taught in human geography, anthropology, criminology, and urban studies programs.
