built complete watches by hand (including the case and dial).

~~George Daniels (watchmaker)–~~
Wikipedia

George Daniels was one of the few modern watchmakers who could create a complete watch by hand, including the movement, case and dial. To achieve this, he had to master the thirty-two individual disciplines which are required to make a watch. During his career, George Daniels completed 27 watches, (not including prototypes).

Description of the book

"Watchmaking": Twenty-eight years after its first publication, the best-selling "Watchmaking" continues to inspire and encourage the art of watchmaking, especially among new generations of enthusiasts.

The first and most comprehensive step-by-step guide on the subject, Watchmaking has become a classic in its own right. This new edition is updated to include a new section which discusses and illustrates a variety of the author's own watches.

The author's principal aim in writing this book has been to inspire and encourage the art of watchmaking, especially among a new generation of enthusiasts. The making of the precision timekeeper is described, step by step, and is illustrated at each stage with line drawings and brief explanatory captions. Great care has been taken to ensure the text is easy to follow and to avoid complicated technical descriptions.

[This] is the remarkable story of George Daniels (1926-2011), the master craftsman, who was born into poverty but raised himself to become the greatest watchmaker of the twentieth century. [He] stands alone ... as the inventor of the ... co-axial escapement, the first substantial advance in portable mechanical

timekeeping over the lever escapement, which has dominated ever since its invention in 1759. ..."--Jacket.

This is the second reprint of the standard work on watchmaking; indispensable to watchmakers and restorers of mechanical watches. George Daniels completed his first watch in 1969, arousing enough interest to generate a renaissance in the art and skills of designing and making individual watches. Watchmaking describes every aspect of the antique craft of watch construction. Line drawings detail every manufacturing technique employed, and completed watches and their component details are illustrated in color. The author's principal aim in writing this book has

been to inspire and encourage the art of watchmaking, especially among a new generation of enthusiasts. As a supreme master of this art, his advice is constantly sought both by students and watch repairers. His understanding of the problems that can beset the would-be watchmaker, especially in an age of mass production, his expert knowledge of the history of watchmaking, together with his concern for the continuation of the art, have convinced him of the need for a comprehensive study of the subject. One of the most interesting aspects of George Daniel's work, which this book describes, is that he makes every component of the watch himself. In addition to explaining the techniques required, many of which he has evolved himself, Daniels describes the tools that will be necessary for
