"In Artful Sentences: Syntax as Style, Virginia Tufte shows how standard sentence patterns and forms contribute to meaning and art in more than a thousand wonderful sentences from the twentieth and twenty-first centuries. The book has special interest for aspiring writers, students of literature and language, and anyone who finds joy in reading and writing."--Publisher's description.

This chapter book in Newbery Honor-winning and bestselling author Louis Sachar's Marvin Redpost series stars Marvin and...the president of the United States? The president of the United States is coming to visit Marvin's class. He's even going to answer one question from each kid! Plus the whole thing is going to be on TV. Marvin is nervous. What if someone steals his question? What if he can't speak when it's his turn? Will he look silly in front of the president and everyone watching? Hilarious and relatable, Marvin Redpost is perfect for kids who love to bond with quirky characters like Junie B. Jones and George Brown, Class Clown.

"Both children and adults will roar with laughter."--School Library Journal Newbery Medal-winning author Beverly Cleary charms readers with yet another lovable character--Socks, a jealous cat who must learn to share his owners with their new baby. Socks is one happy cat. He lives the good life with his affectionate owners, Mr. and Mrs. Bricker. Ever since the day they saved him from a life spent in a mailbox drop slot, Socks has been the center of their world. And he always has everything he needs--tasty kitty treats and all the lap room he could want! But when a new baby arrives, suddenly the Brickers have less and less time for Socks. Little Charles William is the one getting all the attention. Socks feels left out--and to show it, he starts getting into all sorts of trouble! What will it take to make Socks realize just how much the Brickers care about him?

Enrichment clusters engage students and facilitators in student-driven, real-world learning experiences. Grouped by interest, students working like practicing professionals apply advanced content and methods to develop products and services for authentic audiences. Clusters are scheduled during the school day over an extended period of time and involve all students. This updated second edition of Enrichment Clusters provides the rationale for including this important enrichment program for all students, suggestions for creating buy-in, and a step-by-step guide for successful implementation of a self-sustaining enrichment cluster program within the context of specific schools. Included are staff development activities, suggestions for evaluation and program improvement, guidelines for developing high quality cluster experiences for teachers and students, suggested resources, and everything one needs to develop, implement, and sustain a top-quality enrichment cluster program.

Every major measure of students' historical understanding since 1917 has demonstrated that students do not retain, understand, or enjoy their school experiences with history. Bruce Lesh believes that this is due to the way we teach history -- lecture and memorization. Over the last fifteen years, Bruce has refined a method of teaching history that mirrors the process used by historians, where students are taught to ask questions of evidence and develop historical explanations. --from publisher description.

On September 15, 1963, a Klan-planted bomb went off in the 16th Street Baptist Church in Birmingham, Alabama. Fourteen-year-old Carolyn Maull was just a few feet away when the bomb exploded, killing four of her friends in the girl's restroom she had just exited. It was one of the seminal moments in the Civil Rights movement, a sad day in American history . . . and the turning point in a young girl's life. While the World Watched is a poignant and gripping eyewitness account of life in the Jim Crow South: from the bombings, riots, and assassinations to the historic marches and triumphs that characterized the Civil Rights movement. A uniquely moving exploration of how racial relations have evolved over the past 5 decades, While the World Watched is an incredible testament to how far we've come and how far we have yet to go.

This highly regarded work brings together prominent authorities on vocabulary teaching and learning to provide a comprehensive yet concise guide to effective instruction. The book showcases practical ways to teach specific vocabulary words and word-learning strategies and create engaging, word-rich classrooms. Instructional activities and games for diverse learners are brought to life with detailed examples. Drawing on the most rigorous research available, the editors and contributors distill what PreK-8 teachers need to know and do to support all students' ongoing vocabulary growth and enjoyment of reading. New to This Edition*Reflects the latest research and instructional practices.*New section (five chapters) on pressing current issues in the field: assessment, authentic reading experiences, English language learners, uses of multimedia tools, and the vocabularies of narrative and informational texts.*Contributor panel expanded with additional leading researchers.

Results from national and international assessments indicate that school children in the United States are not learning mathematics well enough. Many students cannot correctly apply computational algorithms to solve problems. Their understanding and use of decimals and fractions are especially weak. Indeed, helping all children succeed in mathematics is an imperative national goal. However, for our youth to succeed, we need to change how we

teaching this discipline. Helping Children Learn Mathematics provides comprehensive and reliable information that will guide efforts to improve school mathematics from pre--kindergarten through eighth grade. The authors explain the five strands of mathematical proficiency and discuss the major changes that need to be made in mathematics instruction, instructional materials, assessments, teacher education, and the broader educational system and answers some of the frequently asked questions when it comes to mathematics instruction. The book concludes by providing recommended actions for parents and caregivers, teachers, administrators, and policy makers, stressing the importance that everyone work together to ensure a mathematically literate society.

Rev. ed. of: Designing effective mathematics instruction / Marcy Stein, Jerry Silbert, Douglas Carnine, 3rd ed., 1997.
