This new edition has been extensively updated to reflect developments in Georgia politics and government since 2007—a decade that has seen three presidential election cycles, two midterm elections, and a census. Updates reflect not only changes in how Georgia is governed but also the economic and social trends helping to drive those changes. These include the continued growth and dispersal of Hispanic and Asian populations; the decline, by a variety of measures, of rural areas; and the moderating effect of probusiness government factions on social conservative agendas. This edition maintains the book's comparative approach, which examines the state from three revealing perspectives. This allows readers to determine the extent to which Georgia is similar to its peers on such topics as the length and features of the constitution, the organization of the state government, and the nature of policies. All this allows students and scholars to have a better understanding of the political and economic dynamics of Georgia and the relationship of those dynamics to national political and economic developments. The result is a thorough, up-to-date resource on Georgia's dynamic political system. Features: -Coverage of trends and events since the prior edition appeared in 2007 -Analysis of the most recent state elections -A rewritten chapter on the judiciary that reflects greater representation of women and minorities on the bench and a sharp rise in Republican appointees -A rewritten chapter on policy, with added detail on such topics as transportation, the environment, education, social welfare, and public safety and security -Extensive revisions to sections on the U.S. Constitution -The removal of a chapter on public opinion so that its contents can be more tightly woven throughout the book -Greater attention to the increased power of interest groups -Acknowledgment throughout of the impact of the web and social media in politics and government

Compilation of Laws for the education community and practitioners fully updated with statutes enacted by the Georgia General Assembly through the 2019 Regular Session.

Georgia Domestic Relations features provisions relating to marriage and divorce, adoption, child custody proceedings and child support. Title 19 (Domestic Relations) is included in full and is annotated with case notes and research references from The Official Code of Georgia Annotated. This publication is updated annually to include legislation from the current legislative session.

Solution-based casework is an approach to assessment, case planning, and case management that combines what we know from clinical social work with what we value about sound social work practice. It is grounded in family-centered social work and draws from clinical approaches within social work and mental health. By integrating problem- and solution-focused approaches that form the clinical and social work traditions, treatment partnerships are more easily formed between family, caseworker, and service provider. Solution-Based Casework is a skill-based, practice-oriented text that provides the specific guidance that students and new practitioners need in order to make sense quickly of the complex tasks of assessment and case planning in child welfare. The book flows out of a long practice experience, and was developed in consultation with workers and supervisors who were attempting to remedy problems viewed as contributing to recurrent abuse

and neglect. It seeks to end adversarial relationships in casework and advocates case plans based on specific outcome skills rather than on those written with vague outcome goals measuring attendance in counseling. It serves as a common conceptual framework for integrating disparate segments of a response network, thereby allowing all providers in a therapeutic system to work toward common goals. The text is divided into three sections. In Section I the conceptual history and theoretical foundations of solution-based casework are presented so that the reader can place this approach to casework within the ongoing professional conversation about what constitutes sound practice. Section II addresses issues of assessment and case planning. Section III focuses on case management issues and how treatment team members experience a solution-based casework approach.
