The Gesundheit Institute, a non-profit healthcare organization, is a project in holistic medical care based on the belief that one cannot separate the health of the individual from the health of the family, the community, the society, and the world. Our mission is to reframe and reclaim the concept of 'hospital'.

Carl met Patch more than 20 years ago when both were presenters at a national healthcare conference. That connection and the resulting friendship turned out to be life-changing and started him on a path to clowning in public. He is presently Chief of Community Mental Health with the Gesundheit! Institute.

The inspiring and hilarious story of Patch Adams's quest to bring free health care to the world and to transform the way doctors practice medicine • Tells the story of Patch Adam's lifetime quest to transform the health care system • Released as a film from Universal Pictures, starring Robin Williams Meet Patch Adams, M.D., a social revolutionary who has devoted his career to giving away health care. his frequent lectures at medical schools and international conferences, Adams's irrepressible energy cuts through the businesslike facade of the medical industry to address the caring relationship between doctor and patient that is at the heart of true medicine. All author royalties are used to fund The Gesundheit Institute, a 40-bed free hospital in West Virginia. Adams's positive vision and plan for the future is an inspiration for those concerned with the inaccessibility of affordable, quality health care. Today's high-tech medicine has become too costly, impersonal, and grim. In his frequent lectures to colleges, churches, community groups, medical schools, and conferences, Patch shows how healing can be a loving, creative, humorous human exchange--not a business transaction.

Gersundheit! : bringing good health to you, the medical system, and society through physician service, complementary therapies, humor and joy.

Dr. Patch Adams shares some of the best of the more than 40,000 letters he's received over 30 years, not just from patients seeking answers, but from medical practitioners who yearn to bring compassion and caring back to modern medicine.

The conditions for strategic health communication campaigns as a public health tool are examined for low-income contexts. The theoretical framework drafts a socioecological model with an extension of poverty influences to bring into focus the dynamics of a resource-poor environment and its impact on health-related behaviours and health campaigns. The research design includes two studies conducted in Sierra Leone. Study 1 triangulated three qualitative methods to explore past and current health communication practice in Sierra Leone. Study 2 is a mixed-methods field experiment on handwashing which explored the effects of different campaign strategies. Results show that a community-based participatory approach with the inclusion of local leaders as health messengers was associated with higher chances of behaviour change than a non-treated setting. Further pathways for context-sensitive approaches for deprived audiences are suggested.

B is for Balance is about the individual nurse – the professional, the multi-tasker, the ‘be all things to all people’ leader. While the first edition of B is for Balance was well-received and has been a great resource to nurses and other professionals, the second edition has been updated to focus on 12 steps to balance, including engagement, focus, sleep deficits, fatigue, diet, re-inventing one’s career, and the need for each of us to live longer and to live well.

Provides biographies and historical overviews of communes and utopias in the United States, discussing the beliefs, structure, and key figures in both religious and secular utopian communities.

Clowns’ slapstick is their primary mode of performance and allows them to provoke audiences to laughter wherever they perform. This innovative book, focussing on contemporary practice in the USA and Europe over the last 50 years, investigates the nature and function of clown performance in modern society. Through analysis of clowning in a range of settings - theatre, the circus, hospitals, refugee camps and churches - Peacock establishes a theoretical framework for the evaluation of physical comedy. Peacock explores clowning that takes place outside of conventional venues, and also the therapeutic potential of clowning in clown doctor organisations, refugee camps and war zones. Serious Play: Modern Clown Performance is the first book of its kind to consider clowning performance venues and performance styles in the light of Play Theory, including comparisons of traditional clown comedy with contemporary circuses such as Circus OZ and Cirque du Soleil, and an in-depth look at famous clowns such as Nola Rae and Slava Polunin.

This book proposes an innovative new model for transforming racial and cultural lines in health and social care through communication processes, and introduces listening partnerships as a cost-effective, sustainable intervention to improve communication skills. Transforming Racial and Cultural Lines in Health and Social Care walks the reader through the process of developing the essential skills for racially and culturally effective and compassionate communication. Divided into four parts, the book includes examples that highlight the significance of each skill and provides listening partnerships on each topic. In the final part of the book, Froehlich and Thornton-Marsh interview medical, health, and social care practitioners regarding their experiences in using racially and culturally effective communication to transform health and social care. Improved communication enhances the experience of health and social care for both patients and practitioners and ultimately supports better health outcomes. Transforming Racial and Cultural Lines in Health and Social Care is essential reading for health and social care students looking to improve their communication skills and provide better care.
