Modern parenting is defined by an unprecedented level of overprotectiveness: parents now rush to school to deliver forgotten assignments, challenge teachers on report card disappointments, mastermind children’s friendships, and interfere on the playing field. As teacher, journalist, and parent Jessica Lahey explains, even though these parents see themselves as being highly responsive to their children’s well-being, they aren’t giving them the chance to experience failure—or the opportunity to learn to solve their own problems. Everywhere she turned, Lahey saw an obvious and startling fear of failure—in both her students and in her own children. This fear has the potential to undermine children’s autonomy, competence, motivation, and their relationships with the adults in their lives. Providing a clear path toward solutions, Lahey lays out a blueprint with targeted advice for handling homework, report cards, social dynamics, and sports. Most important, she sets forth a plan to help parents learn to step back and embrace their children’s setbacks along with their successes. Empathetic and wise, The Gift of Failure is essential reading for parents, educators, and psychologists nationwide who want to help children thrive—and grow into independent, confident adults. “It’s hard to overstate the importance of this book. The Gift of Failure is beautifully written and deeply researched. But most of all it’s the one book we all need to read if we want to instill the next generation with confidence and joy.”—Susan Cain, author of Quiet “Instead of lecturing us about what we’re doing wrong, Jessica Lahey reveals what she did wrong with her own children and students—and how she systematically reformed her ways. A refreshing, practical book for parents who want to raise resilient kids but aren’t sure how to start.”—Amanda Ripley, author of The Smartest Kids in the World “Lahey offers one of the most important parenting messages of our times: unless we allow our children to learn how to take on challenges, they won’t thrive in school and in life. Her extremely helpful book tells her story, compiles research, and provides hundreds of doable suggestions.”—Ellen Galinsky, author of Mind in the Making “This fascinating, thought-provoking book shows that to help children succeed, we must allow them to fail. Essential reading for parents, teachers, coaches, psychologists, and anyone else who wants to guide children toward lives of independence, creativity, and courage.”—Gretchen Rubin, author of The Happiness Project “How can we help our children grow to be resourceful, happy adults? Lahey shows in practical terms how to know what your child is ready for and how to offer support even as you encourage autonomy. A wise, engaging book steeped in scientific research and tempered with common sense.”—Daniel T. Willingham, PhD, author of Why Don’t Students Like School? “Through an artful combination of anecdote and research, Lahey delivers a lesson that moms and dads badly need to learn: that failure is vital to children’s success. Any parent who pines for a saner, more informed approach to childrearing should read this book.”—Jennifer Senior, author of All Joy and No Fun

Challenges conventional views about standardized testing to argue that success is more determined by self-discipline, and describes the work of pioneering researchers and educators who have enabled effective new teaching methods.

First published in the mid 1960s, How Children Fail began an education reform movement that continues today. In his 1982 edition, John Holt added new insights into how children investigate the world, into the perennial problems of classroom learning, grading, testing, and into the role of the trust and authority in every learning situation. His understanding of children, the clarity of his thought, and his deep affection for children have made both How Children Fail and its companion volume, How Children Learn, enduring classics.

New York Times Bestseller "Julie Lythcott-Haims is a national treasure. . . . A must-read for every parent who senses that there is a healthier and saner way to raise our children." -Madeline Levine, author of the New York Times bestsellers The Price of Privilege and Teach Your Children Well "For parents who want to foster hearty self-reliance instead of hollow self-esteem, How to Raise an Adult is the right book at the right time." -Daniel H. Pink, author of the New York Times bestsellers Drive and A Whole New Mind A provocative manifesto that exposes the harms of helicopter parenting and sets forth an alternate philosophy for raising preteens and teens to self-sufficient young adulthood In How to Raise an Adult, Julie Lythcott-Haims draws on research, on conversations with admissions officers, educators, and employers, and on her own insights as a mother and as a student dean to highlight the ways in which overparenting harms children, their stressed-out parents, and society at large. While empathizing with the parental hopes and, especially, fears that lead to overhelping, Lythcott-Haims offers practical alternative strategies that underline the importance of allowing children to make their own mistakes and develop the resilience, resourcefulness, and inner determination necessary for success. Relevant to parents of toddlers as well as of twentysomethings—and of special value to parents of teens—this book is a rallying cry for those who wish to ensure that the next generation can take charge of their own lives with competence and confidence.

Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well- being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

A clinical neuropsychologist and test-prep guru combine cutting-edge brain science with insights from their work with families to make a radical case for giving kids more freedom to unleash their full potential.

The founder and director of the Thirty Million Words Initiative, Professor Dana Suskind, explains why the most important—and astoundingly simple—thing you can do for your child’s future success in life is to talk to them. What nurtures the brain to optimum intelligence and stability? It is a secret hiding in plain sight: the most important thing we can do for our children is to have conversations with them. The way you talk with your growing child literally builds his or her brain. Parent talk can drastically improve school readiness and lifelong learning in everything from math to art. Indeed, parent-child talk is a fundamental, critical factor in building grit, self-control, leadership skills, and generosity. It is crucial to making the most in life of the luck you have with your genes. This landmark account of a new scientific perspective describes what works and what doesn't (baby talk is fine; relentless correction isn't).
