Although the bike was simple to use and operated like a scooter, the DNA had motorcycle front forks, larger front and rear discs, dummy fuel tank, digital display on the clocks and ' clip on ' style handlebars which gave the DNA 50 a more ' sports bike ' riding position.

From its origins the Italian battlefields of the Second World War, to movie roles as Audrey Hepburn's transport in Roman Holiday and Sting's stylish companion in Quadrophenia and on through the current vintage revival, the classic Italian motor scooter is an enduring design classic from the 20th century. Scootermania celebrates the superbly simple vehicles that are so symbolic of freedom, style and the modern world. Originating in the 1940s in Milan and Pontedera, Tuscany, the scooter became an enduring transport choice for young people and urban environments. Early chapters look at scooter racing and long-distance attempts, and their role as an anti-tank weapon in the French army. There is engaging coverage of place of scooters in popular culture from films, music and fashion including the way that a host of disparate groups has made the bikes their own — from the British Mods of the 1960s and 1980s to their role in American and Japanese fashion and in their Italian homeland. The evolution and design of classic models as the Vespa 150 GS and the Lambretta LI 150 Series 3 are covered while scooter stars such as Enrico Piaggio and Georges Monneret are celebrated in their own words. The book also includes a number of specially photographed features on modern scooter designers, collectors and artists.

Illustrated with full colour photographs throughout, and featuring clear, easy-to-follow instructions, this book is a must-have for scooter users.

The mortal danger of nuclear weapons is unique in its terrifying potential for devastation on an unprecedented and unimaginable scale. In this book, Sidney D. Drell and James E. Goodby—each with more than twenty years' experience in national security issues both in public and private capacities—review the main policy issues surrounding nonproliferation of nuclear weapons. They address the specific actions that the community of nations—with American leadership—should take to confront and turn back the nuclear danger that imperils humanity. The nuclear genie, say the authors, cannot be put back in the bottle. Our most urgent task as a nation today is to successfully manage, contain, and reduce the grave danger of nuclear weapons—whether in the hands of adversaries or friendly states. This book hopes to stimulate active public dialogue on this important subject.
