China has had constitutional minority language rights for decades, but what do they mean today? Answering with nuance and empirical detail, this book examines the rights through a sociolinguistic study of Zhuang, the language of China's largest minority group. The analysis traces language policy from the Constitution to local government practices, investigating how Zhuang language rights are experienced as opening or restricting socioeconomic opportunity. The study finds

that language rights do not challenge ascendant marketised and mobility-focused language ideologies which ascribe low value to Zhuang. However, people still value a Zhuang identity validated by government policy and practice. Rooted in a Bourdieusian approach to language, power and legal discourse, this is the first major publication to integrate contemporary debates in linguistics about mobility, capitalism and globalization into a study of China ' s language policy. The book refines Grey ' s award-winning doctoral dissertation, which received the Joshua A. Fishman Award in 2018. The judges said the study " decenter[s] all types of sociolinguistic assumptions." It is a thought-provoking work on minority rights and language politics, relevant

Charles C. Fries (1887-1967) was a major figure in American linguistics and language education during the first half of the 20th century. Theoretical innovation and practical implementation were important threads

that ran throughout his work. Fries believed that the attempt to deal with practical problems was a vital part of developing linguistic theory. He spent most of his effort exploring grammar as a tool for communicating meaning. Charles C. Fries was quite influential in the development of linguistics in the United States, and yet in some ways remained outside of the mainstream of the linguistics he helped to develop. The contributors to this volume were asked to present and evaluate some aspect of Fries' work and to show how similar ideas are being used today.

This book, *Teaching Learners with Visual Impairment*, focuses on holistic support to learners with visual

impairment in and beyond the classroom and school context. Special attention is given to classroom practice, learning support, curriculum differentiation and assessment practices, to mention but a few areas of focus covered in the book. In this manner, this book makes a significant contribution to the existing body of knowledge on the implementation of inclusive education policy with learners affected by visual impairment.

This book examines language change and documentation during the First World War. With contributions from international academics, the chapters cover all aspects of communicating in a transnational war including languages at the front;

interpretation, translation and parallels between languages; communication with the home front; propaganda and language manipulation; and recording language during the war. This book will appeal to a wide readership, including linguists and historians and is complemented by the sister volume *Languages and the First World War: Representation and Memory* which examines issues around the representation and memory of the war such as portrayals in letters and diaries, documentation of language change, and the language of remembering the war.
