The International Guide to Student Achievement brings together and critically examines the major influences shaping student achievement today. There are many, often competing, claims about how to enhance student achievement, raising the questions of "What works?" and "What works best?" World-renowned bestselling authors, John Hattie and Eric M. Anderman have invited an international group of scholars to write brief, empirically-supported articles that examine predictors of academic achievement across a variety of topics and domains. Rather than telling people what to do in their schools and classrooms, this guide simply provides the first-ever compendium of research that summarizes what is known about the major influences shaping students' academic achievement around the world. Readers can apply this knowledge base to their own school and classroom settings. The 150+ entries serve as intellectual building blocks to creatively mix into new or existing educational arrangements and aim for quick, easy reference. Chapter authors follow a common format that allows readers to more seamlessly compare and contrast information across entries, guiding readers to apply this knowledge to their own classrooms, their curriculums and teaching strategies, and their teacher training programs.

Global Migration and Education makes a notable contribution to understanding the issues faced by immigrant children, their parents, and educators as they interact in school settings, and to identifying the common challenges to, and successes in, educational institutions worldwide as they cope with these issues. Global in scope, there are chapters from 14 countries. It will help educators and others involved in these complex processes to see beyond the notion of problems created and experienced by recently arrived young children. Rather, this volume provides many concrete suggestions deriving from the success stories and voices of teachers, parents, and students. It also offers evidence that diversity can be a condition for learning that, when understood, embraced, and supported, leads to rich learning opportunities for all involved that would not exist without diversity. All of the authors offer recommendations about educational policy and practices to address and ultimately improve the education of all children, including immigrant children. The book is organized around five themes: *Multiple Global Issues for Immigrant Children and the Schools They Attend; *They Are Here: Newcomers in the Schools; *Views and Voices of Immigrant Children; *Far from Home With Fluctuating Hopes; and *Searching for New Ways to Belong. Intended for researchers, students, school professionals, and educational policymakers and analysts around the world in the fields of multicultural education, child psychology, comparative and international education, educational foundations, educational policy, and cross-cultural studies, this book is highly relevant as a text for courses in these areas.

The mission of the International Journal of Educational Reform (IJER) is to keep readers up-to-date with worldwide developments in education reform by providing scholarly information and practical analysis from recognized international authorities. As the only peer-reviewed scholarly publication that combines authors' voices without regard for the political affiliations perspectives, or research methodologies, IJER provides readers with a balanced view of all sides of the political and educational mainstream. To this end, IJER includes, but is not limited to, inquiry based and opinion pieces on developments in such areas as policy, administration, curriculum, instruction, law, and research. IJER should thus be of interest to professional educators with decision-making roles and policymakers at all levels since it provides a broad-based conversation between and among policymakers, practitioners, and academicians about reform goals, objectives, and methods for success throughout the world. Readers can call on IJER to learn from an international group of reform implementers by discovering what they can do that has actually worked. IJER can also help readers to understand the pitfalls of current reforms in order to avoid making similar mistakes. Finally, it is the mission of IJER to help readers to learn about key issues in school reform from movers and shakers who help to study and shape the power base directing educational reform in the U.S. and the world.

Cultural traditions do adversely affect the education of many people in the world. Women are, unfortunately, the most affected victims of

their culture. This book demonstrates how cultural traditions can militate against the education of women in Zambia with a focus on the Tumbuka tribe. The evidence at hand demonstrates that patrilineal groupings are strongholds of the patriarchal predisposition and patriarchal attitudes and cultural traditions do not recognize women as equal partners with men. The Tumbuka women's experiences and beliefs reflect socio-cultural traditional norms that tend to limit gender equality, and compel women to accept and justify male domination at the expense of their own status and to regard consequent inequalities as normal. Evidence demonstrates that the initiation rites, an active institution for girls of pubescent age, interfere more with the school-based education of girls. The women are active social agents as well as passive learners who will not allow the girls they are coaching to question the purpose for some traditional practices that are oppressive and directly cause them to fail to complete their schooling successfully.

Assessment of student learning outcomes (ASLO) is one of the key activities in teaching and learning. It serves as the source of information in determining the quality of education at the classroom and national levels. Results from any assessment have an influence on decision making, on policy development related to improving individual student achievement, and to ensure the equity and quality of an education system. ASLO provides teachers and school heads with information for making decisions regarding a student's progress. The information allows teachers and school heads to understand a student's performance better. This report reviews ASLO in three South Asian countries---Bangladesh, Nepal, and Sri Lanka---with a focus on public examinations, national assessment, school-based assessment, and classroom assessment practiced in these countries.

Turkey's education system stands out internationally as a success story. In recent decades, participation has been vastly expanded, becoming universal at lower levels of schooling and outperforming other middle-income countries in upper secondary education. However, the education system is also marked by disparities, with only around half of 15-year olds acquiring the essential competencies they need for life and work.

The Handbook of Bilingual and Multilingual Education presents the first comprehensive international reference work of the latest policies, practices, and theories related to the dynamic interdisciplinary field of bilingual and multilingual education. Represents the first comprehensive reference work that covers bilingual, multilingual, and multicultural educational policies and practices around the world. Features contributions from 78 established and emerging international scholars. Offers extensive coverage in sixteen chapters of language and education issues in specific and diverse regional/geographic contexts, including South Africa, Mexico, Latvia, Cambodia, Japan, and Texas. Covers pedagogical issues such as language assessment as well as offering evolving perspectives on the needs of specific learner populations, such as ELLs, learners with language impairments, and bilingual education outside of the classroom.

Education in East and Central Africa is a comprehensive critical reference guide to education in the region. With chapters written by an international team of leading regional education experts, the book explores the education systems of Djibouti, Eritrea, Ethiopia, Kenya, Somalia, South Sudan, Tanzania, Uganda, Zambia, Angola, Burundi, the Central African Republic, the Democratic Republic of Congo, Equatorial Guinea and Sao Tome, Gabon, the Republic of Congo and Rwanda. The book critically examines the regional development of education provision in each country as well as recent reforms and global contexts. Including a comparative introduction to the issues facing education in the region as a whole and guides to available online datasets, this handbook is an essential reference for researchers, scholars, international agencies and policy-makers at all levels.

This book first gives a brief overview of regional issues and a history of education in Lithuania and describes the development of education in the country since the political changes. It then presents an analysis of the entire education system and identifies key directions for reforms.
