The relationship between teacher and student is an important element of school education and as such irreplaceable: If we want schools to be good places for those who teach and learn there, we must make sure that the educational relationships between teachers and students are good, too. In research about school education, surprisingly little attention is paid to the normative dimension of the relationship between teacher and student. This lacuna points to a desideratum in the philosophy of education: More should be said about the normative structure of the teacher-student relationship, its role in teaching and learning, and its final value for teacher and student. Answering these fundamental philosophical questions is the core of this book. It offers a normatively rich concept of a good teacher-student relationship that is based on the analysis of two major relationship goods: trust and care. Moreover, the book explains the instrumental value of a good educational relationship for the student's achievement of epistemic aims of school education as well as the final value of such a relationship for teacher and student.

Stating that the purpose of life is to love and be loved, the author of *The Five Things We Cannot Change* counsels readers on how to overcome obstacles to healthy relationships, sharing exercises and guided meditations for promoting connection and commitment while overcoming fear.

Everyone talks about the personal ministry of the Word, but how do we make one-another ministry truly biblical? *Gospel-Centered Counseling* equips readers to change lives with Christ's changeless truth. It does so by examining life's seven ultimate questions and then guiding readers on a journey that explores the biblical, gospel-centered narrative of: The Word: "What is truth?" "Where can I find answers?" The Trinity: "Who is God?" "Can I know Him personally?" Creation: "Who am I?" "What makes people tick?" Fall: "What went wrong?" "Why do we do the things we do?" Redemption: "Can I change?" "How do people change?" Glorification: "Where am I headed?" "How does our future destiny impact our present reality?" Sanctification: "How can I help?" "How can I change lives?" Bob Kelleman builds on the foundation of the written Word and provides a gospel-centered resource for understanding people, diagnosing problems, and prescribing biblically-based solutions. *Gospel-Centered Counseling* is the first volume in *The Equipping Christian Counselors Series*, a comprehensive relational training curriculum for the local church that provides a model for equipping God's people to change lives with Christ's changeless truth. This two-volume series weaves together comprehensive biblical insight with compassionate Christian engagement.

This volume is a state-of-the-art compilation of diverse and innovative perspectives, principles, and a number of practiced approaches of fields, courses, and methods of pluralist economics teaching. It fosters constructive controversy aiming to incite authors and commentators to engage in fruitful debate. The complex economic problems of the 21st century require a pluralist, real-world

oriented, and innovative discipline of economics, capable of addressing and teaching those complex issues to students from diverse perspectives. This volume addresses a number of key questions: Which models could be taught outside the equilibrium and optimality paradigm? Which methods could help to improve our understanding of the complex globalized economy? How can qualitative and quantitative methods be combined in a fruitful way to analyze complex economic problems? How can the academic isolation of mainstream economics that has developed over many decades be overcome, despite its attempted transdisciplinary imperialism? What role should knowledge from other disciplines play in teaching economics, and what is the relevance of transdisciplinarity? Through examining these issues, the editors and authors have created a pluralist but cohesive book on teaching economics in the contemporary classroom, drawing from ideas and examples from around the world. *Principles and Pluralist Approaches in Teaching Economics* is a unique collection of diverse perspectives on the methodology and applications of pluralist economics teaching. It will be a great resource for those teaching economics at various levels as well as researchers and intermediate and advanced students searching for pluralism in economics.

The volume provides insights on strategies and technologies for teaching and learning that are being used in unique national/cultural contexts of Africa, Asia and the Middle East, Europe, Latin America, and North America.

Brand relationships are critical because they can enhance company profitability by lowering customer acquisition and retention costs. This is the first serious academic book to offer a psychological perspective on the meaning of and basis for brand relationships, as well as their effects. "The Handbook of Brand Relationships" includes chapters by well-known marketing and psychology scholars on topics related to the meaning, significance, and measurement of brand relationships; the critical connections between consumers and the brand; how brand relationships are formed through both thoughtful and non-thoughtful processes; and how they are built, repaired, and leveraged through brand extensions. An integrative framework introduces the book and summarizes the chapters' key ideas. The handbook also identifies several novel metrics for measuring various aspects of brand relationships, and it includes recommendations for further research.
