A supplement to courses or seminars, this work compiles major papers written during the development of computer science, including papers that are valuable, yet difficult to find. Chapters correspond to the areas listed in the Denning Report on computer science curriculum. Where possible, papers are preceded by an introduction by one of the original authors.

Maximum PC is the magazine that every computer fanatic, PC gamer or content creator must read. Each and every issue is packed with punishing product reviews, insightful and innovative how-to stories and the illuminating technical articles that enthusiasts crave.

The Business of Studio Photography is packed with proven strategies for starting a new studio or improving an existing one?and now this classic book has been thoroughly updated and revised for the new digital-imaging era. Equipment checklists and sample business forms, plus full resource lists for websites, magazines, and books are included. The Business of Studio Photography is the complete one-stop guide to opening and running a successful photography studio.

On behalf of the PROFES Organizing Committee we are proud to present the proceedings of the 10 International Conference on Product Focused Software Process Improvement (PROFES 2009), held in Oulu, Finland. Since the first conference in 1999, the conference has established its place in the software engineering community as a respected conference that brings together participants from academia and industry. The roots of PROFES are in professional software process improvement motivated by product and service quality needs. The conference addresses both the solutions found in practice as well as relevant research results from academia. To ensure that PROFES retains its high quality and focus on the most relevant research issues, the conference has actively maintained close collaboration with industry and subsequently widened its scope to the research areas of collaborative and agile software development. A special focus for 2009 was placed on software business to bridge research and practice in the economics of software engineering. This enabled us to cover software development in a more comprehensive manner and tackle one of the most important current challenges identified by the software industry and software research community - namely, the shift of focus from "products" to "services." The current global economic downturn emphasizes the need for new methods and solutions for fast and business-oriented development of products and services in a globally distributed environment.
