The aim of this book is to link demand and supply of environmental information in the field of Life Cycle Management. The book is based on the results of the CHAINET concerted action financed by EU-DGXII for the work period 1998-2000, and is intended to build bridges between the different scientific communities in the field of Life Cycle Management. A structured approach is followed, meaning that both demand and supply of environmental information are characterised, after which the two are linked.

This is one in a series of manuals for car or motorcycle owners. Each book provides information on routine maintenance and servicing, with tasks described and photographed in a step-by-step sequence so that even a novice can do the work.

"In the past fifteen years, file sharing of digital cultural works between individuals has been at the center of a number of debates on the future of culture itself. To some, sharing constitutes piracy, to be fought against and eradicated. Others see it as unavoidable, and table proposals to compensate for its harmful effects. Meanwhile, little progress has been made towards addressing the real challenges facing culture in a digital world. Sharing starts from a radically different viewpoint, namely that the non-market sharing of digital works is both legitimate and useful. It supports this premise with empirical research, demonstrating that non-market sharing leads to more diversity in the attention given to various works. Taking stock of what we have learned about the cultural economy in recent years, Sharing sets out the conditions necessary for valuable cultural functions to remain sustainable in this context."--[P] 4 of cover.

This new edition of the Modern French Grammar is an innovative reference guide to French, combining traditional and function-based grammar in a single volume. Divided into two parts, Part A covers traditional grammatical categories such as word order, nouns, verbs and adjectives and Part B is organized around language functions and notions such as: giving and seeking information describing processes and results expressing likes, dislikes and preferences. With a strong emphasis on contemporary usage, all grammar points and functions are richly illustrated with examples. Implementing feedback from users of the first edition of the Grammar, this second edition includes clearer explanations and greater emphasis on areas of particular difficulty for learners of French. This is the ideal reference grammar for learners of French at all levels, from beginner to advanced. No prior knowledge of grammatical terminology is assumed and a glossary of grammatical terms is provided. This Grammar is complemented by the Modern French Grammar Workbook Second Edition which features related exercises and activities.

In West Africa a dynamic informal sector dominates the stagnant formal economy. Small operators coexist with very large and politically well-connected informal enterprises and well-organised networks. To date there have been relatively few systematic studies of this dual feature, and consequently too little is known about it. Determinants and appropriate policy responses are likely to differ between 'large' and 'small' informal operations. This study focuses on the urban informal sector in three capital cities: Dakar (Senegal), Cotonou (Benin) and Ouagadougou (Burkina Faso). These three countries have important differences and as a group, are quite representative of francophone West Africa and to a lesser extent West Africa as a whole. A mix of quantitative and qualitative approaches was used, with data obtained from original surveys of 900 firms in the three cities, interviews with knowledgeable stakeholders and participants, and all available secondary data. The results for West Africa presented in this book corroborate many findings from earlier studies, particularly for small informal firms. In addition, the book breaks new ground by shedding light on the large informal sector and the influence of institutional and socio-cultural factors in shaping the informal sector.

This book demonstrates the importance of Léon Duguit for property theory in both the civil and common law world. It translates into English for the first time ever Duguit's seminal lecture on property, the sixth of a series given in 1911 in Buenos Aires. It also collects essays from the leading experts on the social function of property in major civil and common law jurisdictions internationally. The book explores the importance that the notion of the social function of property has come to have not only in France but in the entire civil law tradition, and also considers the wide – if un-attributed and seldom regarded – influence in the common law tradition and theory of property.
