Infusion Nurses Society's most recognized publication, the newly revised Infusion Therapy Standards of Practice has long provided the framework that guides clinical practice. The Standards helps define and develop organizational infusion-based policies and procedures for all practice settings.

In the United States, preschool education is characterized by the dominance of a variegated private sector and patchy, uncoordinated oversight of the public sector. Tracing the history of the American debate over preschool education, Andrew Karch argues that the current state of decentralization and fragmentation is the consequence of a chain of reactions and counterreactions to policy decisions dating from the late 1960s and early 1970s, when preschool advocates did not achieve their vision for a comprehensive national program but did manage to foster initiatives at both the state and national levels. Over time, beneficiaries of these initiatives and officials with jurisdiction over preschool education have become ardent defenders of the status quo. Today, advocates of greater government involvement must take on a diverse and entrenched set of constituencies resistant to policy change. In his close analysis of the politics of preschool education, Karch demonstrates how to apply the concepts of policy feedback, critical junctures, and venue shopping to the study of social policy.

Since the introduction of communicative language teaching, collaborative learning has played an important role in the second language (L2) classroom. Drawing from sociocultural theory, which states that human cognitive development is a socially situated activity mediated by language, studies in L2 pedagogy advocate the use of tasks that require learners to work together. Collaborative dialogue encourages language learning, and research shows that the solutions reached by students in this process are more often correct with a lasting influence on their language comprehension. This volume includes ten chapters that illustrate the benefits of collaborative dialogue in second foreign language classrooms. The volume considers key issues dealing with collaborative tasks and implications for language teaching.

Based on the research and experience of Dow, Schabacker, and Edwards, Technical Analysis of Stock Trends, Ninth Edition presents proven techniques, methods, and procedures for success, even in today 's unpredictable markets. New and updated material on Dow Theory and long term investing, including new tables of

Bestselling author Alex Kotlowitz is one of this country's foremost writers on the ever explosive issue of race. In this gripping and ultimately profound book, Kotlowitz takes us to two towns in southern Michigan, St. Joseph and Benton Harbor, separated by the St. Joseph River. Geographically close, but worlds apart, they are a living metaphor for America's racial divisions: St. Joseph is a prosperous lakeshore community and ninety-five percent white, while Benton Harbor is impoverished and ninety-two percent black. When the body of a black teenaged boy from Benton Harbor is found in the river, unhealed wounds and suspicions between the two towns' populations surface as well. The investigation into the young man's death becomes, inevitably, a screen on which each town projects their resentments and fears. The Other Side of the River sensitively portrays the lives and hopes of the towns' citizens as they wrestle with this mystery--and reveals the attitudes and misperceptions that undermine race relations throughout America.

This Open access book offers updated and revised information on vessel health and preservation (VHP), a model concept first published in poster form in 2008 and in JVA in 2012, which has received a great deal of attention, especially in the US, UK and Australia. The book presents a model and a new way of thinking applied to vascular access and administration of intravenous treatment, and shows how establishing and maintaining a route of access to the bloodstream is essential for patients in acute care today. Until now, little thought has been given to an intentional process to guide selection, insertion and management of vascular access devices (VADs) and by default actions are based on crisis management when a quickly selected VAD fails. The book details how VHP establishes a framework or pathway model for each step of the patient experience, intentionally guiding, improving and eliminating risk when possible. The evidence points to the fact that reducing fragmentation, establishing a pathway, and teaching the process to all stakeholders reduces complications with intravenous therapy, improves efficiency and diminishes cost. As such this book appeals to bedside nurses, physicians and other health professionals.

Lipids and Skin Health is the first effort to summarize and review the studies, ideas, and research that link lipid metabolism to the largest organ of our body, the skin. The book covers the fundamental biology of the skin, and the major involvement of the transcriptional factors that govern lipid synthesis and the bioactive lipids in this intriguing organ. All layers of skin are presented, as well as their relevant lipids from the epidermis to dermis and even to the hypodermis. The important and unique-to-skin biological pathways are laid out, with a special focus on the various models that demonstrate the essential role of lipid synthesis in skin pathophysiology. The use of lipids in the cosmetic industry is emphasized, and last but not least the involvement of lipids in the clinical setting is also discussed. This book will appeal to healthcare professionals, researchers and dermatology professionals, and will help them to brainstorm new products and opportunities that will target the emerging importance of lipid metabolism in skin for acne, aging, and healthy skin. Apostolos Pappas, Ph.D., is a professional member of the Institute of Food Technology. He started his professional career as a research biochemist in the Skin Research Center of Johnson & Johnson and later served as a group leader at Munich Biotech, where he worked on cancer research. Thereafter he returned to Johnson & Johnson, where he is currently a Research Manager and Fellow focusing on lipid metabolism research. He has authored numerous scientific publications, patent applications, and books.

This new edition of one of the premier references for geriatric nurses in hospital, long-term, and community settings delivers current guidelines, real-life case studies, and evidence-based protocols developed by master educators and practitioners. With a focus on improving quality of care, cost-effectiveness, and outcome, the fifth edition is updated to provide the most current information about care of common clinical conditions and issues in older patients. Several new expert contributors present current guidelines about hip fractures, frailty, perioperative and postoperative care, palliative care, and senior-friendly emergency departments. Additionally, chapters have been reorganized to enhance logical flow of content and easy information retrieval. Protocols, systematically tested by more than 300 participating NICHE (Nurses Improving Care for Health system Elders) hospitals, are organized in a consistent format and include an overview, evidence-based assessment and intervention strategies, and an illustrative case study with discussion. Additionally, protocols are embedded within chapter text, providing the context and detailed evidence for each. Chapter objectives, annotated references, and evidence ratings for each protocol are provided along with resources for additional study. New to the Fifth Edition: Reorganized to enhance logical flow of information and ease of use Updated and revised Includes new contributions from expert educators and practitioners Provides new chapters on perioperative and postoperative care, general surgical care, care of hip fracture, palliative care, and the senior-friendly emergency department Key Features: Includes PowerPoints and a test bank for instructors Delivers evidence-based, current guidelines and protocols for care of common clinical conditions in the older person Illustrates the application of clinical protocols to real-life practice through case studies and discussion Edited by nationally known geriatric leaders who are endorsed by the Hartford Institute for Geriatric Nursing and NICHE Written for nursing students, nurse leaders, and practitioners at all levels, including those in specialty roles

The Handbook of Technology and Second Language Teaching and Learning presents a comprehensive exploration of the impact of technology on the field of second language learning. The rapidly evolving language-technology interface has propelled dramatic changes in, and increased opportunities for, second language teaching and learning. Its influence has been felt no less keenly in the approaches and methods of assessing learners' language and researching language teaching and learning. Contributions from a team of international scholars make up the Handbook consisting of four parts: language teaching and learning through technology; the technology-pedagogy interface; technology for L2 assessment; and research and development of technology for language learning. It considers how technology assists in all areas of language development, the emergence of pedagogy at the intersection of language and technology, technology in language assessment, and major research issues in research and development of technologies for language learning. It covers all aspects of language including grammar, vocabulary, reading, writing, listening, speaking, pragmatics, and intercultural learning, as well as new pedagogical and assessment approaches, and new ways of conceiving and conducting research and development. The Handbook of Technology and Second Language Teaching and Learning demonstrates the extensive, multifaceted implications of technology for language teachers, learners, materials-developers, and researchers.
