Automated Performer Flying: The State of the Art shares the secrets of performer flying in entertainment history and provides step-by-step instructions on how to create a performer flying effect from scratch. This book sheds light on all aspects of performer flying, covering its history, explaining concepts like mechanical compensation versus electrical compensation, providing guidance on how to calculate stopping distances and forces, and sharing tips on how to build successful relationships with performers. Case studies of prominent productions featuring performer flying, including Cirque du Soleil and Beyoncé, are included throughout. Written for technical directors, theatrical riggers, and students of rigging, technical direction, and stagecraft courses, Automated Performer Flying takes readers through the process of creating a performer flying effect from the first spark of the idea to opening night.

Supplement to 3d ed. called Selected characteristics of occupations (physical demands, working conditions, training time) issued by Bureau of Employment Security.

Packed with precise, step-by-step checklists, detailed illustrations, and informative chapter explanations, the Electrical Inspection Manual, 2014 Edition identifies important Code rules and provides guidance on how-to organize checklists by occupancy type to increase thoroughness and decrease the likelihood of overlooking potential problems. Written by certified electrical inspectors, and endorsed by the National Fire Protection Association (NFPA) and the International Association of Electrical Inspectors (IAEI), this fully illustrated manual explains significant tasks, defines terms, outlines key questions, and provides a concise overview of the electrical inspection process. The training manual is intended to assist electrical inspectors as well as anyone performing a review for Code compliance in advance of a professional inspection. This audience may include, but is not limited to: designers, insurance inspectors, architects, installers, project managers, and safety officers.
