During The Utility Expo, these products by DICA will be in use at many of the different OEM equipment displays, including Terex, Altec, Dur-A-Lift, Elliott, Hiab, Manitowoc, QMC, Ring Power ...

These proceedings contain papers presented at the 3rd IFAC Symposium on Intelligent Autonomous Vehicles held in Madrid, Spain. The aim of the symposium was to present and discuss research and development on advanced applications in the field of land-based marine and aerospace intelligent autonomous vehicles. The papers describe not only new methods and technologies on solving classic problems related with intelligent autonomous vehicles, but also new approaches to their design, such as new architectures, topological navigation and self-learning systems.

Hardbound. The tone of the Proceedings is set by the three Plenary papers, and the remaining papers are arranged under the coherent themes of environment, computational methods, modelling and simulation, design methods and applications. The papers in the Proceedings represent the state-of-the-art in the rapidly changing technology of computer aided design in control systems. They clearly show how that technology is absorbing the most recent developments in computer science and adapting them to its requirements. The reader will find that the emphasis in the technology is shifting towards open environments with object-oriented databases and modern graphical user interfaces supporting a whole range of tools for modelling, analysis and design.
