Between 1887 and 1927, Sir Arthur Conan Doyle wrote sixty Sherlock Holmes stories, and his great Canon has become the most praised, most studied, and best-known chapter in the history of detective fiction. Over twenty thousand publications pertaining to the Sherlock Holmes phenomenon are known to have been published, most of them historical and critical studies. In addition, however, almost since the first stories appeared, such was their uniqueness and extraordinary attraction that other authors began writing stories based on or derived from them. A new genre had appeared: pastiches; parodies; burlesques; and stories that attempted to copy or rival the great detective himself. As the field widened, there was hardly a year in the twentieth century in which new short stories or novels did not appear. Many hundreds are now known to have been published, some of them written by authors well-known for their work in other literary fields. The non-canonical Sherlock Holmes literature not only constitutes a literary field of considerable historical interest, but includes many stories that are both enjoyable and fascinating in their own right. Although a large bibliography on these stories exists, and a few limited anthologies have been published, no attempt has previously been made to collect them all and discuss them comprehensively. The Alternative Sherlock Holmes does so: it provides a new and valuable approach to the Sherlock Holmes literature, as well as making available many works that have for years remained forgotten. Presented as an entertaining narrative, of interest to both the aficionado and the scholar, it provides full bibliographic data on virtually all the known stories in the field.

Science fiction produced in the 1970s has long been undervalued, dismissed by Bruce Sterling as confused, self-involved, and stale. The New Wave was all but over and Cyberpunk had yet to arrive. The decade polarised sf - on the one hand it aspired to be a serious form, addressing issues such as race, Vietnam, feminism, ecology and sexuality, on the other hand it broke box office records with Star Wars, Close Encounters of the Third Kind, Alien and Superman: The Movie. Beginning with chapters on the First sf and New Wave authors who published during the 1970s, Solar Flares examines the ways in which the genre confronted a new epoch and its own history, including the rise of fantasy, the sf blockbuster, children's sf, pseudoscience and postmodernism. It explores significant figures such as Joanna Russ, Samuel R. Delany and Octavia Butler. From Larry Niven's Ringworld to Thomas M. Disch's On Wings of Song, from The Andromeda Strain to Flash Gordon and from Doctor Who to Buck Rogers, this book reclaims seventies sf writing, film and television - alongside music and architecture - as a crucial period in the history of science fiction.

A message appears on the moon. It is legible from Earth, and almost no one knows how it was created. Markus West leads the government ' s investigation to find the creator. The message is simple and familiar. But those three words, written in blazing crimson letters on the lunar surface, will foster the strangest revolution humankind has ever endured and make Markus West wish he was never involved. The message is ' Drink Diet Coke. ' When Coca-Cola denies responsibility, global annoyance with the beverage-industrial complex becomes indignation. And when his investigation confirms Coca-Cola ' s innocence, Markus West becomes one of the most hated men on Earth. Later, five miles above the White House, a cylinder is discovered floating in the night. It is 400 feet tall, 250 feet in diameter, and exactly resembles a can of Campbell ' s Chicken Noodle Soup. Nearly everyone thinks the cylinder is a promotional stunt gone wrong, just like the lunar advertisement. And this is exactly what the alien in the cylinder wants people to think. Ralph, an eccentric extraterrestrial who ' s been hiding on the moon, needs Markus ' s help to personally deliver a dark warning to the White House. Ralph has a big heart, a fetish for Andy Warhol, and a dangerous plan to save the world. Looking upon the cylinder, Markus realizes we are not the ones in control. The unexpected guest becomes the host, and somehow humans never belonged. " We are the homeless orphans peering through the banquet window. We are the frills of the universe gazing upon something unspeakably more central than ourselves."

When a meteorite lands in Surrey, the locals don't know what to make of it. But as Martians emerge and begin killing bystanders, it quickly becomes clear—England is under attack. Armed soldiers converge on the scene to ward off the invaders, but meanwhile, more Martian cylinders land on Earth, bringing reinforcements. As war breaks out across England, the locals must fight for their lives, but life on Earth will never be the same. This is an unabridged version of one of the first fictional accounts of extraterrestrial invasion. H. G. Wells's military science fiction novel was first published in book form in 1898, and is considered a classic of English literature.
