Substitute the values into the equation(s) and solve: $\Delta x = (0 \text{ m/s})(9.56 \text{ s}) + \frac{1}{2}(-9.81 \text{ m/s}^2)(9.56 \text{ s})^2$
 $\Delta x = (0 \text{ m}) + (-448 \text{ m})$
 $\Delta x = -448 \text{ m}$
From the value for Δx the wrench's final speed can be determined as 93.8 m/s, or nearly 340 km/h.
distance from top of building to ground = 448 m.

Read PDF Holt Physics Answers

Building upon Serway and Jewetta's solid foundation in the modern classic text, *Physics for Scientists and Engineers*, this first Asia-Pacific edition of *Physics* is a practical and engaging introduction to Physics. Using international and local case studies and worked examples to add to the concise language and high quality artwork, this new regional edition further engages students and highlights the relevance of this discipline to their learning and lives.

Expands the search for the origins of the universe beyond God and the Big Bang theory, exploring more bizarre possibilities inspired by physicists, theologians, mathematicians, and even novelists.
