We suggest an original method of student cheating evaluation based on the comparison of students' grades in exams in class, home assignments and experimental homework. The data for the study is collected from the survey of 2012 – 2013 sophomores of the International College of Economics and Finance at the National Research University Higher School of Economics in Moscow, Russia. At the end of the course in Statistics in addition to standard assignments (homework and exams) students were given experimental homework with a ban on cooperation among them. The violation of this rule was qualified as cheating. The scale of cooperation is measured and then tested through the stochastic frontier technique; it reveals connection with the GPA level, students' expectations of the cheaters' share and students' moral norms. We also find different behavioral patterns for high and low performing students as well as country specific context of student cheating behavior.

Edited by Nigel Holt and Rob Lewis, the authors of the hugely successful AS Level Psychology: The Student's Textbook (ISBN 9781845900939) and The Study Guide (ISBN 9781845900953), Crown House WJEC Psychology: AS Level, written by Nicola Taylor and Kirsty White, rigorously examines what students need to know for the WJEC psychology AS specification. The beautifully designed, easy-to-use textbook comprehensively covers all of the course material and offers exam hints and questions to aid study. Written by experienced practicing teachers and edited by two experienced examiners, textbook authors and university lecturers, the book includes: evaluation of key studies, to encourage reflection and critical analysis, aid understanding and give context; explanations of the different psychological approaches, including positive psychology, and comparisons between them; evaluation of contemporary debates, including their economic, social and ethical implications; detailed exploration of research methods, including experimental design, research methodologies, analysing and reporting data and dealing with ethical issues; and analysis and evaluation of classic studies. Crown House WJEC Psychology: A Level will be available in 2016.

Chris Runeckles' Making Every History Lesson Count: Six principles to support great history teaching offers lasting solutions to age-old problems and empowers history teachers with the confidence to bring their subject to life. Making EveryHistory Lesson Count goes in search of answers to the crucial question that all history teachers must ask: What can I do to help my students retain and interrogate the rich detail of the content that I deliver? Writing in the practical, engaging style of the award-winning Making Every Lesson Count, Chris Runeckles articulates the fundamentals of great history teaching and shares simple, realistic strategies designed to deliver memorable lessons. The book is underpinned by six pedagogical principles challenge, explanation, modelling, practice, feedback and questioning and equips history teachers with the tools and techniques to help students better engage with the subject matter and develop more sophisticated historical analysis and arguments. In an age of educational quick fixes and ever-moving goalposts, this carefully crafted addition to the Making Every Lesson Count series expertly bridges the gap between the realms of academic research and the humble classroom. It therefore marries evidence-based practice with collective experience and, in doing so, inspires a challenging approach to secondary school history teaching. Making EveryHistory Lesson Count has been written for new and experienced practitioners alike, offering gimmick-free advice that will energise them to more effectively carve out those unique moments of resonance with young people. Each chapter also concludes with a series of questions that will prompt reflective thought and enable educators to relate the content to their own classroom practice. Suitable for history teachers of students aged 11 to 16 years.

In this updated edition, Cathy Vatterott examines the role homework has played in the culture of schooling over the years; how such factors as family life, the media, and "homework gap" issues based on shifting demographics have affected the homework controversy; and what recent research as well as common sense tell us about the effects of homework on student learning. She also explores how the current homework debate has been reshaped by forces including the Common Core, a pervasive media and technology presence, the mass hysteria of "achievement culture," and the increasing shift to standards-based and formative

assessment. The best way to address the homework controversy is not to eliminate homework. Instead, the author urges educators to replace the old paradigm (characterized by long-standing cultural beliefs, moralistic views, and behaviorist philosophy) with a new paradigm based on the following elements: Designing high-quality homework tasks; Differentiating homework tasks; Deemphasizing grading of homework; Improving homework completion; and Implementing homework support programs. Numerous examples from teachers and schools illustrate the new paradigm in action, and readers will find useful new tools to start them on their own journey. The end product is homework that works—for all students, at all levels.

This volume showcases previously unpublished research on theoretical, descriptive, and methodological innovations for understanding language patterns grounded in a Systemic Functional Linguistic perspective. Featuring contributions from an international range of scholars, the book demonstrates how advances in SFL have developed to reflect the breadth of variation in language and how descriptive methodologies for language have evolved in turn. Taken together, the volume offers a comprehensive account of Systemic Functional Language description, providing a foundation for practice and further research for students and scholars in descriptive linguistics, SFL, and theoretical linguistics.
