There is a high demand for antimicrobials for the treatment of new and emerging microbial diseases. In particular, microbes developing multidrug resistance have created a pressing need to search for a new generation of antimicrobial agents, which are effective, safe and can be used for the cure of multidrug-resistant microbial infections. Nano-antimicrobials offer effective solutions for these challenges; the details of these new technologies are presented here. The book includes chapters by an international team of experts. Chemical, physical, electrochemical, photochemical and mechanical methods of synthesis are covered. Moreover, biological synthesis using microbes, an option that is both eco-friendly and economically viable, is presented. The antimicrobial potential of different nanoparticles is also covered, bioactivity mechanisms are elaborated on, and several applications are reviewed in separate sections. Lastly, the toxicology of nano-antimicrobials is briefly assessed.

Postmodernism seemed to promise an end to the grim Cold War era of nuclear confrontation and oppressive ideologies. This expanded edition brilliantly elucidates this hall of mirrors with Richard Appignanesi's witty and easy-to-follow text and the inspired cartoonist Chris Garratt.

Provides an overall introduction to the welding process, illustrating most of the common equipment and work techniques for both the home and shop welding.

At thirty-two, Marine Vandale is still waiting for true love. The kind of love that takes your breath away, knocks you on the ground, and makes you scared and crazy all at once. “ You're certainly not going to find it if you spend all your time with three guys, ” her mother likes to remind her. It's just that Marine, her ex Laurent, Jeff her roommate, and their best friend Julien are inseparable. Together, they're trying to navigate the troubled waters of their thirties, become real adults and tame love. But what used to seem like child's play is becoming less and less of a game, and today's mistakes are not as meaningless as the ones they made in their twenties. But each one in his or her own way continues to hope. And from date to date, from man to man, through a thousand situations she describes as “ summer stock theatre, ” Marine persists in believing that one day she'll prove to her mother that you can't fight love.

A clear exposition of the dynamics of mechanical systems from an engineering perspective.
