Change is unpredictable, emergent and often discontinuous (big spikes, separated by periods of inertia). Feedback often dampens change and drags the system back to equilibrium. Not only that, but the system is 'constantly changing without our intervention, and our efforts to change it will be more like joining a football game than sitting down to fix a broken clock.'

Switching the metaphor, the baby could be stillborn if we cannot midwife its birth. Change happens in the world and calls for change from us. We are inclined to talk of “ emergence ” , and there is indeed a natural trajectory as life gets more complex. That natural trajectory is as true of ecologies as it is of socio-psychological reality.

What are the factors that drive successful social and environmental movements, while others falter?* *How Change Happens* examines the leadership approaches, campaign strategies, and ground-level tactics employed in a range of modern social change campaigns. The book explores successful movements that have achieved phenomenal impact since the 1980s—tobacco control, gun rights expansion, LGBT marriage equality, and acid rain elimination. It also examines recent campaigns that seem to have fizzled, like Occupy Wall Street, and those that continue to struggle, like gun violence prevention and carbon emissions reduction. And it explores implications for

public services, reform laws and regulations, guarantee human rights, get a fairer deal for those on the sharp end, achieve greater recognition for any number of issues, or simply be treated with respect. Striking then, why so many universities lack programs for social activists, to which students can turn for advice and inspiration. Instead, scholarly discussions of change are fragmented with few conversations crossing disciplinary boundaries, rarely making it onto the radar of those actively seeking change. This book bridges the gap between academia and practice, bringing together the best research from a range of academic disciplines and the evolving practical understanding of activists to explore the topic of social and political change. How does social change happen? When do social movements take off? Sexual harassment was once something that women had to endure; now a movement has risen up against it. White nationalist sentiments, on the other hand, were largely kept out of mainstream discourse; now there is no shortage of media outlets for them. In this book, with the help of behavioral economics, psychology, and other fields, Cass Sunstein casts a bright new light on how change happens.

Why is it so hard to make lasting changes in our companies, in our communities, and in our own lives? The primary obstacle is a conflict that's built into our brains, say Chip and Dan Heath, authors of the critically acclaimed bestseller *Made to Stick*. Psychologists have discovered that our minds are ruled by two different systems - the rational mind and the emotional mind—that compete for control. The rational mind wants a great beach body; the emotional mind wants that Oreo cookie. The rational mind wants to change something at work; the emotional mind loves the comfort of the existing routine. This tension can doom a change effort - but if it is overcome, change can come quickly. In *Switch*, the Heaths show how everyday people -

employees and managers, parents and nurses - have united both minds and, as a result, achieved dramatic results:

- The lowly medical interns who managed to defeat an entrenched, decades-old medical practice that was endangering patients
- The home-organizing guru who developed a simple technique for overcoming the dread of housekeeping
- The manager who transformed a lackadaisical customer-support team into service zealots by removing a standard tool of customer service

In a compelling, story-driven narrative, the Heaths bring together decades of counterintuitive research in psychology, sociology, and other fields to shed new light on how we can effect transformative change. Switch shows that successful changes follow a pattern, a pattern you can use to make the changes that matter to you, whether your interest is in changing the world or changing your waistline.

Which means there ’ s really just one option—embracing change is the only path to living your true life. So laugh at it, with George Carlin. Celebrate it, like Patti Smith and David Bowie. Above all, grow with it, like Maya Angelou, Stephen Hawking, Rebecca Solnit, Rumi, and so many others. Arranged alphabetically by subject—including Adapting, Control, Faith, Letting Go, New Beginnings, Surprises—CHANGE HAPPENS is the book that says: You can do this...as often as you need to hear it. “ Change is not merely necessary to life—it is life. ” – ALVIN TOFFLER Exciting. But often painful. Exhilarating, but unsettling. Clarifying. Bewildering.
