Sound Inventions is a collection of 34 articles taken from Experimental Musical Instruments, the seminal journal published from 1984 through 1999. In addition to the selected articles, the editors have contributed introductory essays, placing the material in cultural and temporal context, providing an overview of the field both before and after the time of original publication. The Experimental Musical Instruments journal contributed extensively to a number of sub-fields, including sound sculpture and sound art, sound design, tuning theory, musical instrument acoustics, timbre and timbral perception, musical instrument construction and materials, pedagogy, and contemporary performance and composition. This book provides a picture of this important early period, presenting a wealth of material that is as valuable and relevant today as it was when first published, making it essential reading for anyone researching, working with or studying sound.

Covering every phase of a theatrical production, this fourth edition of Sound and Music for the Theatre traces the process of sound design from initial concept through implementation in actual performances. The book discusses the early evolution of sound design and how it supports the play, from researching sources for music and effects, to negotiating a contract. It shows you how to organize the construction of the sound design elements, how the designer functions in a rehearsal, and how to set up and train an operator to run sound equipment. This instructive information is interspersed with ' war stores ' describing real-life problems with solutions that you can apply in your own

Maximum PC is the magazine that every computer fanatic, PC gamer or content creator must read. Each and every issue is packed with punishing product reviews, insightful and innovative how-to stories and the illuminating technical articles that enthusiasts crave.

Post Sound Design provides a practical introduction to the fascinating craft of editing and replacing dialog, creating Foley and sound effects, editing music, and balancing these elements to a final mix. Based on years of experience and teaching this material to students at Drexel University, award-winning film composer John Avarese offers user-friendly knowledge and stimulating exercises to help compose story, develop characters and create emotion through skillful creation of the sound track. Starting each chapter with a real-life example, the textbook is structured in such a way to create a fundamental understanding of the physics and the biological foundation of hearing, and putting it into practice with suggested movie scenes demonstrating the discussed audio techniques. Post Sound Design engagingly demonstrates the individual areas essential to creating a soundtrack that will enhance any media production.

In the 1900s, the dream of owning their own land draws thousands of immigrants to the Canadian West. One of them is Billy King, an adventurous youngster who emigrates from England with his family to a rough-and-tumble Saskatchewan town and then over the Rocky Mountains to a very different way of life in Victoria, BC, where he must learn the ways of the sea. With the onset of war in Europe, his life in Canada is uprooted, but not enough to discourage him from realizing his dream of becoming a forest ranger in Alberta's Rocky Mountains. The life-and-death challenges of this unforgiving environment and the people who live there--ranchers, miners, mountain men, and a remarkable native elder--redefine his world. But a devastating personal loss changes his life forever. Written by Bill's widow, To Climb a Mountain is a remarkable true story of a young man who came of age as Canada itself was maturing into a strong nation.

Perfect for fans of *Raymie Nightingale* and *The Fourteenth Goldfish*, this heartfelt middle-grade novel seamlessly melds STEAM content with first loss in an honest and striking debut. When Mika starts fifth grade at the middle school, her neat life gets messy. Separated from old friends and starting new classes, Mika is far from her comfort zone. And math class is the most confusing of all, especially when her teacher Mr. Vann assigns math journals. Art in math? Who's ever heard of such a thing? But when challenges arise at home, Mika realizes there are no easy answers. Maybe, with some help from friends, family, and one unique teacher, a math journal can help her work out problems, and not just the math ones. Debut author Jennifer Swender delivers poignant prose and illustrator Jennifer Naalchigar brings Mika's journal to life in this perfect equation of honesty plus hope that adds up to a heartwarming coming-of-age story.
