Adjust the shoulder straps until they are level with or just below the top of your baby's shoulders. The shoulder harnesses are fed through whichever of the three loop positions that best fits your baby. When you place your baby in the seat, secure the waist straps around his waist and the shoulder straps over his shoulders. Pull the crotch strap up between his legs and connect everything by placing the male end of each strap into the crotch strap's buckle.

A close friendship is one of the most influential and important relationships a human life can contain. Anyone will tell you that! But for all the rosy sentiments surrounding friendship, most people don ' t talk much about what it really takes to stay close for the long haul. Now two friends, Aminatou Sow and Ann Friedman, tell the story of their equally messy and life-affirming Big Friendship in this honest and hilarious book that chronicles their first decade in one another ' s lives. As the hosts of the hit podcast Call Your Girlfriend, they ' ve become known for frank and intimate conversations. In this book, they bring that energy to their own friendship—its joys and its pitfalls. Aminatou and Ann define Big Friendship as a strong, significant bond that transcends life phases, geographical locations, and emotional shifts. And they should know: the two have had moments of charmed bliss and deep frustation, of profound connection and gut-wrenching alienation. They have weathered life-threatening health scares, getting fired from their dream jobs, and one unfortunate Thanksgiving dinner eaten in a car in a parking lot in Rancho Cucamonga. Through interviews with friends and experts, they have come to understand that their struggles are not unique. And that the most important part of a Big Friendship is making the decision to invest in one another again and again. An inspiring and entertaining testament to the power of society ' s most underappreciated relationship, Big Friendship will invite you to think about how your own bonds are formed, challenged, and preserved. It is a call to value your friendships in all of their complexity. Actively choose them. And, sometimes, fight for them.

There has never been a craze like Beanie Babies. The \$5 beanbag animals with names like Seaweed the Otter and Gigi the Poodle drove a large swath of America into a greed-fueled frenzy as they chased the rarest Beanie Babies, whose values escalated weekly in the late 1990s. Just as strange as the mass hysteria was the man behind it. Sometimes called the "Steve Jobs of plush" by his employees, he obsessed over every detail of every animal his company ever released. He had no marketing budget and no connections, but he had something more valuable - an intuitive grasp of human psychology that would make him the richest man in the history of toys. The Great Beanie Baby Bubble is a classic American story of people winning and losing vast fortunes chasing what one dealer remembers as "the most spectacular dream ever sold."--Back cover.

America's foremost baby and childcare experts, William Sears M.D. and Martha Sears, R.N., explain the benefits -- for both you and your child -- of connecting with your baby early. Would you and your baby both sleep better if you shared a bed? How old is too old for breastfeeding? What is a father's role in nurturing a newborn? How does early attachment foster a child's eventual independence? Dr. Bill and Martha Sears -- the doctor-and-nurse, husband-and-wife team who coined the term "attachment parenting" -- answer these and many more questions in this practical, inspiring guide. Attachment parenting is a style of parenting that encourages a strong early attachment, and advocates parental responsiveness to babies' dependency needs. The Attachment Parenting Book clearly explains the six "Baby B's" that form the basis of this popular parenting style: Bonding, Breastfeeding, Babywearing, Bedding close to baby, Belief in the language value of baby's cry, and Beware of baby trainers. Here's all the information you need to achieve your most important goals as a new parent: to know your child, to help your child feel right, and to enjoy parenting.

Decades of research have demonstrated that the parent-child dyad and the environment of the familyâ €"which includes all primary caregiversâ €"are at the foundation of children's well- being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.
